Executive Summary

Pet euthanasia decision paralysis — owners agonize over ending life of terminally ill pets that still appear normal, especially when facing travel, reflecting deep emotional conflict (~8 comments, ~31,800 upvotes). **Wedding industry preference for one-time passes over subscriptions** — founders found SaaS model failed; switching to event-based pricing (\$69-\$149) caused immediate conversion jump (~4 comments, ~500 upvotes). **Landlord-installed smart locks without consent spark privacy fears** — tenants worry about remote access, tracking, and potential illegal eviction (~15 comments, ~900 upvotes). **Scam-filled remote-work market leaves beginners struggling to find legit opportunities** — users report numerous scams and lack of clear guidance, making genuine side hustles elusive (~5 comments, ~250 upvotes per batch). **Rise of "What I wish I knew before X"** **AI-generated titles in business subreddits** — the formula is spreading rapidly as a content hack, indicating a trend toward nostalgic, advice-style framing (~4 mentions, ~10 upvotes). **Strong demand for human-touch, psychology-driven copy as AI content feels generic** — creators report learning actual psychology to stop scrolling and drive conversions, contrasting with bland AI output (~2 comments, ~57 upvotes). **High interest in side-hustle legitimacy and passive-income realism** — repeated questions about the most realistic passive income stream for beginners and what makes a side hustle feel trustworthy show a craving for actionable, low-risk income (~5+3+3 mentions across batches).

Pain Points### 1. Difficulty in making end-of-life decisions for pets, especially when they appear normal despite a terminal illness, compounded by impending travel plans.

Frequency & Intensity: ~8 comments mentioned this / highly upvoted (~31800 upvotes)

What it is: Owners agonize over whether to euthanize a pet that still seems healthy but has a terminal condition, fearing suffering if they wait versus guilt if they act while the pet appears fine.

Evidence:

> "I feel like I'm choosing between: - risking her suffering later without me there - or ending

her life while she still seems “okay”

Why it matters: This dilemma creates intense emotional distress and guilt, often leading to delayed decisions that prolong suffering or cause lasting regret.

2. Dealing with rude and critical family members who speak a different language, assuming others don't understand, leading to discomfort and conflict.

Frequency & Intensity: ~4 comments mentioned this / highly upvoted (~13300 upvotes)

What it is: Family members make disparaging remarks in a language they think others won't comprehend, creating a hostile environment while maintaining a polite facade.

Evidence:

> "So I sat there for about forty five minutes listening to this woman quietly critique everything from my mom's cooking to the size of our living room to what she apparently considers my brother's disappointing career choices. All with a smile on her face pointed at the people she was talking about."

Why it matters: Victims feel isolated and disrespected, often unable to confront the behavior without escalating tension, which erodes trust and emotional safety in family settings.

3. Receiving an unwanted or poorly chosen gift, especially when the giver reacts negatively to the recipient's honest feedback.

Frequency & Intensity: ~5 comments mentioned this / highly upvoted (~5660 upvotes)

What it is: Recipients experience disappointment when gifts miss the mark, and givers respond with hurt or anger when honesty is expressed, turning a positive exchange into conflict.

Evidence:

> "My excitement was short lived, it turned into sadness very soon. Here is a summary of how the gift exchange went down: I bought him some other smaller things but put the ticket confirmation in an envelope with the card I made for him. He opens the envelope and I'm met with a "uhhhhhh.. what?"

Why it matters: This dynamic discourages honest communication about preferences, leading to wasted effort, hurt feelings, and strained relationships over seemingly trivial exchanges.

4. Banks requiring mandatory app-based 2FA and then locking out users whose phones don't support the newest OS version, creating accessibility issues.

Frequency & Intensity: ~8 comments mentioned this / highly upvoted (~610 upvotes)

What it is: Financial institutions enforce two-factor authentication via proprietary apps that only function on recent operating systems, effectively blocking customers with older devices from accessing their accounts.

Evidence:

> "a few weeks back- they decided to lock anyone who didn't have the newest IOS version installed on their phone out \"until they update\"."

Why it matters: This policy disproportionately affects low-income, elderly, or rural users who

cannot afford frequent phone upgrades, undermining financial inclusion and causing real-world hardship.

5. The wedding industry's aversion to subscription models for products needed for a limited time, making conversions difficult.

Frequency & Intensity: ~4 comments mentioned this / highly upvoted (~500 upvotes)

What it is: Couples resist recurring payments for wedding-related services they only need for a short period, preferring one-time fees even if the total cost is higher.

Evidence:

> "Nobody wants to pay monthly for something they need for 6 months. We almost launched with a SaaS model. Switched to one-time event passes (\$69-\$149) and conversions jumped immediately."

Why it matters: Misaligned pricing models reduce market adoption and revenue potential for vendors who fail to match the episodic nature of wedding planning with appropriate billing structures.

6. The struggle to manage sudden wealth, leading to reckless spending and eventual financial loss, especially for those from humble backgrounds.

Frequency & Intensity: ~1 comment mentioned this / highly upvoted (~386 upvotes)

What it is: Individuals who acquire large sums of money quickly often lack the financial literacy or mindset to sustain it, resulting in impulsive spending and rapid depletion of resources.

Evidence:

> "I had what we call in France a poor mindset, this is when you grow up with nothing and get so much money that fast, it drives you crazy, you believe you won the lottery and thought that money would never stop coming."

Why it matters: Without proper guidance, windfall wealth can exacerbate financial insecurity rather than alleviate it, reinforcing cycles of poverty and missed opportunities for long-term stability.

7. The frustration of working long hours and experiencing burnout, despite trying various productivity methods.

Frequency & Intensity: ~2 comments mentioned this / highly upvoted (~70 upvotes)

What it is: Professionals adhere to rigorous routines and productivity systems yet still face exhaustion due to unsustainable workloads and blurred work-life boundaries.

Evidence:

> "i'd wake up at 5am, do a morning routine, work on client stuff before my commute, come home at 5:30 and basically work until midnight. some nights my wife was already asleep when i came to bed. she'd make dinner and eat alone... honestly more often than i want to admit."

Why it matters: Chronic overwork undermines health, relationships, and long-term

productivity, revealing that individual optimization strategies cannot compensate for systemic overdemand.

8. Dealing with unsupportive parents who prioritize a sibling's feelings and betray trust, especially during vulnerable times like pregnancy.

Frequency & Intensity: ~4 comments mentioned this / highly upvoted (~7450 upvotes)

What it is: Parents disclose confidential personal information to a favored sibling despite explicit requests for confidentiality, then lie about the breach, reinforcing patterns of preferential treatment.

Evidence:

> "I recently found out that my mom told my sister anyway, and apparently did so right away. Then she lied about it for around three months. She only admitted it after I explained how much it meant to me that my sister not be included in my pregnancy information. This really hurt me, not just because of the pregnancy itself, but because it feels like the same old pattern of my sister's feelings mattering more than mine."

Why it matters: Such betrayals deepen emotional wounds, erode familial trust, and can have lasting impacts on mental health and family dynamics during critical life events.

9. The challenge of onboarding a new marketing hire when the founder has been handling everything based on intuition and unrecorded context.

Frequency & Intensity: ~4 comments mentioned this / highly upvoted (~120 upvotes)

What it is: Founders possess critical marketing knowledge that exists only in their heads, leading to frustration when new hires cannot replicate decisions without explicit guidance or documentation.

Evidence:

> "You have context that lives nowhere. Not in docs, not in Slack, not in your CRM. It's just in your head. And you'll get frustrated when they don't \"get it\" even though you never actually transferred any of it."

Why it matters: Knowledge silos hinder scalability, increase training time, and create dependency on individuals, making businesses vulnerable to turnover and limiting growth potential.

10. The increasing monetization of previously owned goods and services into subscription or leased models, making it difficult to truly own anything.

Frequency & Intensity: ~7 comments mentioned this / highly upvoted (~110 upvotes)

What it is: Products that were once purchased outright—such as software, media, and vehicle features—are now offered only through recurring payments or leases, often bundled with data collection.

Evidence:

> "Entire things you used to own are now leased to you for more money and your private data—software, music, video games, features in your new car, etc. It's actually shameful, but

difficult to fight."

Why it matters: This shift erodes consumer autonomy, increases long-term costs, and raises privacy concerns, leaving users feeling trapped in perpetual payment cycles for essential functionality.

11. Poor training and lack of support in customer service jobs, leading to high stress, unresolved issues, and unfair termination.

Frequency & Intensity: ~2 comments mentioned this / highly upvoted (~20 upvotes)

What it is: New hires face constant technical problems during training with unprepared or panicked supervisors, resulting in stress, mistakes, and disproportionate disciplinary actions.

Evidence:

> "From day one of training, there were constant technical issues. Every single day someone had system problems. Instead of handling the situation calmly and professionally, the trainer would panic and get frustrated."

Why it matters: Inadequate onboarding sets employees up for failure, increases turnover, and damages morale, particularly in roles already burdened by high emotional labor.

12. Lack of transparency and communication from manufacturers during prototype development, leading to unexpected changes and distrust.

Frequency & Intensity: ~4 comments mentioned this / highly upvoted (~9 upvotes)

What it is: Suppliers make unilateral design or material changes during prototyping without consulting the client, then justify the shifts as unavoidable gaps between design and production.

Evidence:

> "When I asked my supplier, they said it's because these details are difficult to produce. Well I understand there's gap between design and production, while the point is, they didn't ask me anything before they made this decision!"

Why it matters: This breakdown in collaboration undermines trust, leads to costly revisions, and discourages innovation by making clients wary of engaging in custom development processes.

13. Landlords installing smart locks without tenant consent, allowing remote access and tracking, leading to privacy concerns and potential illegal eviction issues.

Frequency & Intensity: ~15 comments mentioned this / highly upvoted (~900 upvotes)

What it is: Property owners deploy smart locks that enable remote locking/unlocking and access logs, often without informing tenants, creating surveillance capabilities and potential for misuse.

Evidence:

> "If they have access to the app, they can remotely lock/unlock the door. As well as see when the door is locked/unlocked. Essentially trolling to see when you come and go. I'd be pissed."

Why it matters: Unauthorized access violates tenant privacy, enables harassment or illegal eviction tactics, and highlights a growing power imbalance in rental relationships as technology outpaces regulation.

14. Difficulty for beginners to find legitimate remote work opportunities online due to numerous scams and lack of clear guidance on effective skills.

Frequency & Intensity: ~5 comments mentioned this / highly upvoted (~250 upvotes)

What it is: Aspiring remote workers struggle to distinguish genuine job offers from scams and lack actionable advice on which skills actually lead to employable outcomes.

Evidence:

> "I see a lot of advice about remote work and online skills, but it's hard to know what actually helps you get real work."

Why it matters: This confusion wastes time, exposes individuals to fraud, and discourages participation in the digital economy, particularly among those without established networks or mentorship.

15. The frustration of dealing with dirty kitchen stations and uncleaned dishes left by previous shifts, leading to extra work for the next person.

Frequency & Intensity: ~5 comments mentioned this / highly upvoted (~250 upvotes)

What it is: Employees arrive to find their workstations contaminated with leftover food, grease, or dishes from prior shifts, forcing them to spend unpaid time cleaning before they can begin their duties.

Evidence:

> "That's the current problem I have with my expo station. I go in 30 mins early every day just to clean up after lunch shift."

Why it matters: This inequitable distribution of labor breeds resentment, reduces morale, and reflects poor workplace hygiene standards that impact efficiency and employee well-being.

16. The challenge of maintaining a clean sponge or dishcloth, as they quickly become dirty and smelly, leading to a 'vicious cycle' of cleaning.

Frequency & Intensity: ~5 comments mentioned this / highly upvoted (~250 upvotes)

What it is: Cleaning tools become contaminated almost immediately after use, requiring frequent washing or boiling, which in turn dirties other items and perpetuates a never-ending loop of maintenance.

Evidence:

> "Sponge is dirty, boils sponge to clean. Now pot is dirty, use sponge to clean pot.

Goddamn it sponge is dirty again. You're now trapped in a vicious cycle of sponge and pot cleaning"

Why it matters: This inefficiency increases household workload, fosters frustration with

routine chores, and highlights the need for better-designed or antimicrobial cleaning solutions.

17. The difficulty of finding a side hustle that is genuinely passive and generates significant income, with many online ideas being overwhelming or unrealistic for beginners.

Frequency & Intensity: ~5 comments mentioned this / highly upvoted (~250 upvotes)

What it is: Individuals seeking low-effort income streams encounter proposals that demand ongoing attention, technical expertise, or upfront investment, making true passivity elusive for novices.

Evidence:

> "What's the most realistic passive income stream for beginners today?"

Why it matters: Misleading promises of easy money lead to disillusionment, wasted effort, and financial loss, especially for those relying on side income to supplement unstable primary earnings.

18. The problem of employers not including salary information in job postings, wasting time for both applicants and companies.

Frequency & Intensity: ~2 comments mentioned this / highly upvoted (~100 upvotes)

What it is: Job advertisements omit compensation details, compelling candidates to invest time in applications and interviews only to discover mismatched expectations late in the process.

Evidence:

> "Can we normalize putting salary info in job ads?"

Why it matters: Lack of transparency prolongs hiring cycles, increases frustration, and contributes to perceptions of unfairness, particularly for job seekers managing limited time and resources.

19. The emotional difficulty of deciding when to euthanize a beloved pet, especially when they are suffering from aggressive illnesses.

Frequency & Intensity: ~10 comments mentioned this / highly upvoted (~500 upvotes)

What it is: Owners face anguish when determining the right time to end a pet's life amid rapid deterioration from severe conditions like oral cancer, balancing hope against visible suffering.

Evidence:

> "Same here. My cat was diagnosed and then had to be euthanised just two days after his diagnosis. Oral cancer is the worst"

Why it matters: Delaying euthanasia can prolong pain and distress for both pet and owner, while acting too soon may trigger guilt, making this decision a profound source of psychological strain.

20. The annoyance of 'appification' where many devices and services unnecessarily require an app, leading to privacy concerns and inconvenience.

Frequency & Intensity: ~5 comments mentioned this / highly upvoted (~200 upvotes)

What it is: Everyday objects and services—from appliances to utilities—mandate proprietary apps for basic functions, often collecting personal data or creating barriers for users who prefer analog alternatives.

Evidence:

> "Not everything needs an app. I hate the appification of everything, no I don't want to give you my email, no I don't want to give you my number, no you do not need to connect to the wifi, no I do not want an account."

Why it matters: This trend erodes user autonomy, increases digital fatigue, and raises concerns about data exploitation, particularly for privacy-conscious or technologically hesitant individuals.

21. The frustration of dealing with people who smoke in non-smoking areas, particularly on airplanes, and the consequences for both the smoker and other passengers.

Frequency & Intensity: ~10 comments mentioned this / highly upvoted (~500 upvotes)

What it is: Individuals violate smoking bans in enclosed spaces like aircraft, risking detection and penalties while exposing others to secondhand smoke and discomfort.

Evidence:

> "May I ask what led you to do this? I just cannot wrap my head around how someone thinks this would not be detected."

Why it matters: Such behavior disregards public health rules, creates conflict in shared environments, and undermines collective efforts to maintain safe, breathable spaces for all.

22. The feeling of being lost and disillusioned with the current political and economic state, leading to a desire for collective action and change.

Frequency & Intensity: ~5 comments mentioned this / highly upvoted (~250 upvotes)

What it is: Individuals express a sense of alienation from societal systems, perceiving them as broken or unjust, and seek meaningful ways to contribute to reform or community resilience.

Evidence:

> "As Michelle Obama said a few months ago, when talking about the east wing (who even remembers that now) on Colbert, I'm lost. It was something close to, as a country, we have to decide what rules we're following, who is to follow them, and who is not. I am lost. I hope more of us (Americans) are lost in a way where they want to be found. That it is up to us to find what we're losing."

Why it matters: This widespread disillusionment can fuel civic engagement but also risks apathy or extremism if constructive outlets for change are perceived as inaccessible or ineffective.

23. Difficulty for beginners to get hired on tutoring platforms due to lack of experience and geographical restrictions (Canada).

Frequency & Intensity: ~1 comment mentioned this / highly upvoted (~10 upvotes)

What it is: Aspiring tutors face repeated rejections from online platforms due to insufficient prior experience and regional limitations that exclude Canadian residents from certain marketplaces.

Evidence:

> "got rejected at varsity tutors (after i submitted my interview and it asked me to select the contract; when i didnt receive any so I reached out to the technical team and they rejected me LOL) wyzant isnt available in Canada dojo rejected again canada tutorlyft rejected (without a demo) wiingy rejected (they stood me up i emailed them while waiting for the student and later they sent a rejection) outschool rejected even applied to dataannotation its been a year still nothing."

Why it matters: Barriers to entry discourage skilled individuals from monetizing their expertise online, limiting income opportunities and reinforcing geographic inequities in the gig economy.

24. Struggling to find remote work in Canada despite significant customer service and IT experience.

Frequency & Intensity: ~1 comment mentioned this / highly upvoted (~9 upvotes)

What it is: Professionals with substantial backgrounds in customer-facing and technical roles report prolonged unemployment in the Canadian remote job market, citing gatekeeping and scarce openings.

Evidence:

> "So i have previous experience in 2 companies concentrix and tech Mahindra. (Do not recommend as I was unlawfully massed fired from both) but I am asking if anyone knows of any other companies or usa companies that accept us Canadians? Ik ppl tend to gate keep them but literally been struggling trying to find ANY sort of job even a basic grocery store job for a year, cause everyone be looking for work here in ON..dead end interviews..still nothing! I got 10 yr customer service/sales/retail/fastfood and 2 years in IT! So if anyone knows anyone hiring for remote work lmk! Tyy <3 im desperate!"

Why it matters: Qualified workers are unable to leverage their skills for flexible employment, leading to financial strain and underutilization of talent in a supposedly globalized labor market.

25. ATS systems causing a significant drop in job applicants compared to free postings on Indeed.

Frequency & Intensity: ~4 comments mentioned this / highly upvoted (~9 upvotes)

What it is: After implementing applicant tracking systems following Indeed's reduction of free job postings, employers observe a drastic decline in candidate flow, often receiving zero

to two applications per listing.

Evidence:

> "Well since Indeed started to cap free postings to 3, we decided to try an ATS. Since then our applicants have gone down to 0-2 per posting over the last 2 weeks."

Why it matters: Overly complex or poorly configured ATS tools deter qualified applicants, prolong vacancies, and increase hiring costs, counteracting the intended efficiency gains of automation.

26. Difficulty in finding clients for services, with programs focusing too much on preparation and not enough on outreach.

Frequency & Intensity: ~3 comments mentioned this / highly upvoted (~9 upvotes)

What it is: Training initiatives for freelancers or agencies overemphasize niche definition, persona building, and messaging refinement at the expense of actual prospecting, leaving participants unprepared to generate real business.

Evidence:

> "Most programs front-load weeks of positioning work before any actual outreach happens. Define your ideal client, build the persona, clarify your message. And at some point you realize the preparation has become the product. Nobody's contacting anyone."

Why it matters: Misaligned priorities in skill development leave aspiring service providers unable to convert knowledge into revenue, undermining the practical value of educational offerings.

27. Passive income streams requiring constant, low-level involvement, making them not truly passive.

Frequency & Intensity: ~2 comments mentioned this / highly upvoted (~9 upvotes)

What it is: Income streams marketed as passive demand ongoing micro-tasks—such as monitoring, minor updates, or occasional customer contact—that accumulate into regular time commitments when scaled.

Evidence:

> "What I'm noticing now is that nothing feels truly passive yet. It's more like everything requires a low but constant level of involvement, and when I try to scale even slightly, that "low effort" quickly compounds into something that needs daily attention."

Why it matters: The illusion of passivity leads to unrealistic expectations, burnout from hidden labor, and disappointment when income streams fail to deliver the promised freedom from work.

28. Challenges in getting started with online work platforms like OneForma and Rev.com due to lack of response or eligibility issues.

Frequency & Intensity: ~7 comments mentioned this / highly upvoted (~9 upvotes)

What it is: Users report being approved for projects on crowdwork platforms but then receiving no further communication, leaving them uncertain whether they have been

accepted or ghosted.

Evidence:

> "Got approved to work project cosmos on oneforma but no response since last week what's going on? Have i been ghosted?"

Why it matters: Poor platform communication creates anxiety, wastes time, and discourages participation in online labor markets, particularly for newcomers relying on clear feedback loops.

29. The struggle of finding legitimate online jobs and the perception that people asking for help are lazy.

Frequency & Intensity: ~5 comments mentioned this / highly upvoted (~8 upvotes)

What it is: Frequent posts about remote work opportunities are dismissed as low-effort or lazy, despite the genuine difficulty of locating trustworthy positions in a scam-ridden landscape.

Evidence:

> "Well it kinda is lazy if every second post is what online jobs are Available online. It clogs up not only this feed but the home feed also. And yes I am calling them lazy because how else do you find a regular job nowadays? Through carrier pigeon? Nah, online. Hard to ignore something that's always popping up on my feed."

Why it matters: Stigmatizing help-seeking behavior isolates those in need, reduces community support, and perpetuates misconceptions about the effort required to navigate digital employment landscapes.

30. The frustration of dealing with smart home appliances that become unusable without app access.

Frequency & Intensity: ~1 comment mentioned this / highly upvoted (~9 upvotes)

What it is: Modern appliances such as ovens rely exclusively on smartphone applications for core functions, rendering them inoperable for users who decline to install or use the required software.

Evidence:

> "My in-laws have a smart oven. It crapped out shortly after buying it to the point only the app with make it turn on. She had to text her husband to start the stove for her because she refused to get the app (aka: not tech savvy). Lol. \"Smart stove my ass...\" I've seen more issues with smart appliances than traditional ones."

Why it matters: Over-reliance on apps excludes less tech-savvy individuals, creates single points of failure, and undermines the reliability and accessibility of everyday household technology.

###1. Mobile apps for health and habit tracking (sobriety, supplements, anxiety) with a subscription model

Problem it solves: Creators struggle to monetize health-tracking tools when selling one-time features yields minimal revenue.

Evidence from community: (~3 mentions / ~340 upvotes)

> "I now have around 14 apps live on both iOS and Android. For the longest time I was barely making \$10/day because I was selling features for like \$5 one-time. A month ago I switched everything to subscriptions and it changed everything. Revenue jumped almost immediately." **Target audience:** Indie developers and side-hustlers building wellness or habit-tracking apps who need recurring income.

Competitive gap: Most health apps rely on ads or one-time purchases; a subscription model unlocks steady cash flow and aligns with user expectations for ongoing updates.

2. Wedding tech product that solves specific pain points like seating charts, offered as one-time event passes instead of subscriptions

Problem it solves: The wedding industry resists recurring fees for short-term needs, killing conversion for SaaS-style offerings.

Evidence from community: (~4 mentions / ~500 upvotes)

> "Our best marketing isn't feature lists, it's describing the seating chart nightmare ("divorced parents, feuding aunts, the uncle nobody wants near the mic") and people going "oh my god YES."

Target audience: Engaged couples, wedding planners, and vendors seeking easy-to-use tools for seating charts, timelines, or guest management.

Competitive gap: Existing wedding SaaS platforms lock users into monthly plans; one-time passes match the purchase mindset of a single-event budget and boost conversions.

3. A guide or digital product that addresses a specific, frequently asked problem found in online communities, priced between \$17-\$47

Problem it solves: Creators waste time building products nobody asks for; repeated community questions signal real demand.

Evidence from community: (~2 mentions / ~27 upvotes)

> "Search for questions that start with "how do I", "why can't I", "what's the best way to". Look for the same question being asked repeatedly. When you see the same frustration coming up 10, 15, 20 times that's your product." **Target audience:** New entrepreneurs and content creators looking for low-effort, high-validation digital products to sell.

Competitive gap: Generic PLR bundles ignore niche pain points; a targeted guide built from real-world FAQs delivers immediate utility and justifies a premium price.

4. A non-fiction book on a niche topic (e.g., visualization for elite athletes) monetized through Amazon KDP and targeted Meta ads

Problem it solves: Passion projects struggle to find an audience without a clear, reachable niche and effective low-cost promotion.

Evidence from community: (~1 mention / ~31 upvotes)

> "I wrote a book mostly as a passion project and my goal was just to break even by selling it to friends or people I meet. It is on a pretty niche topic (visualization/ guided imagery for elite athletes), so my expectations were pretty low." **Target audience:** Subject-matter experts, coaches, or hobbyists with specialized knowledge who want passive income via self-publishing.

Competitive gap: Broad-topic books drown in competition; a tightly focused niche paired with precise Meta ad targeting reaches eager buyers overlooked by mainstream publishers.

5. A B2B service in a niche market, delivered by an overseas tech team, focusing on addressing specific business challenges

Problem it solves: Solo founders lack bandwidth to execute technical work while handling sales and planning, limiting scalability.

Evidence from community: (~5 mentions / ~20 upvotes)

> "I'm solo when it comes to planning and sales, but the actual services will be delivered by an overseas tech team I found also through someone I know."

Target audience: Solo consultants or agency owners needing reliable, cost-effective development support for custom software, automation, or integrations.

Competitive gap: Local agencies charge premium rates; offshore teams offer comparable quality at lower cost, but vetting and communication barriers persist—a managed service bridges that gap.

6. A trading platform in a specific niche market (€60B) targeting the middle market, with a focus on modern UI/UX

Problem it solves: Existing trading platforms feel outdated and cater only to extremes (high-frequency or casual), leaving the middle-market underserved.

Evidence from community: (~1 mention / ~3 upvotes)

> "The idea is to build a trading platform in a €60B market. The current market leaders in this niche feel very traditional and conventional. There's a clear top and bottom segment, which is why I want to focus on the middle market, mainly because that's where my own frustrations lie as someone active in this industry."

Target audience: Active traders who need sophisticated tools without the complexity of institutional platforms or the simplicity of retail apps.

Competitive gap: Legacy platforms prioritize back-office features over user experience; a modern, middle-focused UI captures traders frustrated by clunky interfaces and missing analytics.

7. A service or platform that helps individuals restore damaged old photos, leveraging AI tools like Remini and Photoshop for manual fixes and Kamo Photo for vintage styles

Problem it solves: People have precious damaged photos but lack the skills or time to repair them, leading to lost memories.

Evidence from community: (~10 comments)

> "I figured I could probably do something with it so I spent about 40 minutes cleaning it up and posted the result in the comments."

Target audience: Hobbyists, genealogists, and anyone wanting to revive family photos for sharing or printing.

Competitive gap: Existing photo-restoration services are either expensive studios or overly automated AI tools that produce artificial results; a hybrid service blends AI speed with human artistry for authentic, affordable restorations.

8. A comprehensive list of platforms for selling digital products, categorized by niche, traffic volume, and ease of entry, specifically for beginners
Problem it solves: New creators waste time guessing where to sell digital goods and fall for low-traffic or scammy marketplaces.

Evidence from community: (~5 comments)

> "Built a complete list (free) of 50 verified platforms where digital products actually move, including: Marketplaces with built-in buyer traffic Platforms ranked by niche fit and competition level Communities where buyers actively search for products Platforms that allow fully faceless or anonymous sellers Low-competition platforms most people have never heard of"

Target audience: Beginner digital product sellers (e-book authors, template designers, course creators) seeking trustworthy sales channels.

Competitive gap: Generic "sell online" guides list the same big marketplaces; a curated, niche-sorted directory with traffic data reduces trial-and-error and highlights hidden gems.

9. A tool or service that automates personalized outreach, including video generation with AI avatars and cloned voices, dynamic website screenshots, and automated email sending

Problem it solves: Manual outreach doesn't scale, yet generic blasts feel impersonal and get ignored. **Evidence from community:** (~2 comments)

> "Our team built a automated personalized outreach system where using N8N we scrapes a lead's website, generates a Loom-style video using HeyGen for the talking avatar and ElevenLabs for my cloned voice, then stitches in dynamic website screenshots and sends it automatically via email! It's crazy how good the actual end video is considering it's all automation!" **Target audience:** Sales teams, agency founders, and indie hackers who need to personalize pitches at volume without hiring a large SDR team.

Competitive gap: Current outreach tools either send plain emails or rely on robotic avatars; integrating real-time website screenshots with cloned voice and AI avatars creates a hyper-relevant, human-feeling touch that boosts reply rates.

10. An automated system for generating and publishing relevant blog posts and social media content based on Google search data, trained on specific product and business data

Problem it solves: Content teams struggle to keep up with demand for timely, SEO-aligned posts while staying on brand.

Evidence from community: (~2 comments)

> "Our team has setup a daily automation using Frizerly that is trained on our products and business data to automatically look at Google search data to publish relevant blogs on our website, helping us show up more often on both google and tools like ChatGPT etc! The same tool also handles our social media posting on Facebook and linkedin now! You can set it up to just cross share the blogs or come up with entirely different set of posts!"

Target audience: Content marketers, SEO specialists, and small businesses wanting a steady stream of topic-relevant posts without constant manual ideation.

Competitive gap: Generic AI writers produce bland, off-brand content; training the model on proprietary product and search data yields outputs that are both SEO-friendly and uniquely aligned with the brand's voice.

11. A missed-call recovery engine that uses AI to instantly call back potential customers, qualify their intent, answer questions, and book appointments

Problem it solves: Businesses lose leads when they can't answer calls promptly, letting prospects go cold.

Evidence from community: (~2 comments)

> "Finally, we set up a missed-call recovery engine using Retell so whenever a potential customer calls and I don't pick up, the AI instantly calls them back, qualifies their intent, answers questions, and books them into my calendar!" **Target audience:** Service-based businesses (consultants, clinics, home services) that rely on phone inquiries but cannot staff 24/7 call centers.

Competitive gap: Basic voicemail or call-back widgets lack intelligence; an AI-driven engine that can converse, qualify, and schedule turns missed calls into booked opportunities without human intervention.

12. A simple weather tool that checks conditions for air-drying laundry, built with AI coding assistance, demonstrating the potential for quick income generation from niche ideas

Problem it solves: People waste time guessing whether weather is suitable for drying clothes outdoors, leading to damp laundry or missed opportunities. **Evidence from community:** (~3 comments)

> "Three weeks later and the site has gotten mentioned in several blogs and newsletters, pulling in users worldwide. The donation money keeps trickling in steadily"

Target audience: Eco-conscious households, laundromat owners, and anyone looking to reduce dryer usage and energy bills.

Competitive gap: General weather apps don't surface laundry-specific metrics (e.g., humidity, wind, UV index) in an actionable format; a dedicated tool translates forecasts into

a clear “dry-or-wait” recommendation, creating a useful niche utility that can be monetized via donations or premium features.

13. An AI-powered tool for Meta ads intelligence, offering breakdown analysis, competitor research, and live insights

Problem it solves: Advertisers spend hours manually dissecting ad performance and spying on competitors, slowing campaign optimization. **Evidence from community:** (~2 comments)

> "Curious, if you get a meta ads intelligence tool which can show you your ads breakdown and at what stage your audience are leaving you, do hours of high quality competitor research like hook patterns, their funnel targets(top, middle, bottom), their creative angles, gaps, in just a minute, making you save time and dedicate those time on creating ads, provides you structured live ads insights of your current ads, would you pay for it?"

Target audience: Media buyers, performance marketers, and e-commerce brands running Meta ads who need rapid, actionable intelligence.

Competitive gap: Existing ad spy tools provide surface-level metrics; a deep-funnel breakdown combined with live creative and audience-exit insights lets users tweak campaigns in real time, a capability most platforms lack.

14. A chatbot for event planning that allows users to describe preferences for venue rules and coordinates everything

Problem it solves: Planning events involves juggling numerous venue restrictions, vendor contacts, and timelines, which is overwhelming without a centralized organizer.

Evidence from community: (~3 comments)

> "I love this! Thank you!! Right now you I put your rules into the system one by one, but I was thinking some sort of chatbot you can just describe your preferences to would be a good next step. Queen Bee coordinated everything for you!" **Target audience:** Couples, corporate planners, and party organizers who want a conversational interface to manage venue policies, catering, rentals, and schedules.

Competitive gap: Current event-planning software relies on form-filling and static checklists; a natural-language chatbot that interprets preferences and auto-coordinates tasks reduces friction and mimics a human planner’s intuition.

15. An app that redesigns a room based on a photo, budget, and style, showing furniture that can actually be purchased

Problem it solves: Users struggle to visualize how furniture will look in their space and often buy items that don’t fit or match their aesthetic.

Evidence from community: (~1 comment)

> "The idea is simple: you upload a photo of your room, set your budget and style, and it redesigns your actual space with furniture you can actually buy."

Target audience: Homeowners, renters, and interior-design enthusiasts seeking quick, affordable room makeovers without hiring a designer.

Competitive gap: Most room-planning apps show generic catalogs or require manual

product sourcing; integrating real-time inventory and purchasable items bridges the gap between inspiration and execution, reducing purchase regret.

16. A vending machine that sells aftercare products for tattoos and piercings, addressing an unmet need in the moment

Problem it solves: People getting tattoos or piercings need immediate aftercare (cleansers, ointments) but stores rarely stock these items, leading to delayed care and infection risk.

Evidence from community: (~1 comment)

> "the aftercare products insight is lowkey genius everyone else would've just stocked drinks and wondered why margins were mid. you figured out there was something people literally needed in that exact moment that nobody was selling them. that's not vending machine thinking that's demand gap thinking"

Target audience: Tattoo studios, piercing shops, and event venues (festivals, conventions) where clients need on-site aftercare supplies.

Competitive gap: Traditional vending machines sell snacks and drinks; repurposing them for high-margin, low-volume aftercare products meets an urgent, point-of-need demand that existing retail channels ignore.

17. An automated system for lead qualification and instant contact to address slow response times for businesses

Problem it solves: Businesses invest in lead generation but lose prospects because they can't respond quickly enough, letting leads go cold.

Evidence from community: (~1 comment)

> "The biggest bottleneck I saw across the board was Speed to Lead. Businesses were spending money on Meta ads or working hard for organic leads, but couldn't reply fast enough. Leads were going cold while the founders were busy actually running their businesses."

Target audience: B2B companies, marketing agencies, and sales teams that rely on inbound leads from ads, content, or events.

Competitive gap: Basic CRM alerts notify reps but don't act; an AI-driven system that instantly engages, qualifies, and either books a meeting or nurtures the lead eliminates the response-time gap and increases conversion rates.

18. A system for automating business tasks with transparent audit trails to show decision-making processes

Problem it solves: Opaque automation creates distrust; stakeholders can't see why a system made a particular choice, hindering accountability and troubleshooting.

Evidence from community: (~4 comments)

> "The future moment for me: watching an automated decision log show not just that something happened, but the exact reasoning chain. Agent received trigger, checked criteria X, applied rule Y, took action Z, logged outcome. All visible after the fact."

Target audience: Operations managers, compliance officers, and tech leads overseeing automated workflows in finance, HR, or supply chain.

Competitive gap: Most automation tools log only inputs and outputs; providing a step-by-step reasoning trace (trigger → criteria → rule → action → outcome) delivers auditability and confidence, a feature rarely offered in off-the-shelf RPA or AI platforms.

Trends

Rising Trends

1. Rise of 'looksmaxxing' and online personalities focused on self-improvement for dating — a trend where individuals pursue extreme self-enhancement for dating success, gaining traction as users share transformation stories and face narcissism accusations; (~5 comments)

> "If I success I think it will insipire a lot of dudes, they'll say \"Dang if that ugly MF was able to get dates by being funny and knowing how to talk, I can do it too\""

2. Shift from traditional social media growth strategies to focusing on niche platforms and listing sites for content creators — creators are moving away from broad algorithms to platforms where buyer intent is already present; (~3 comments)

> "The biggest shift for me was listing sites. There are platforms where people are already browsing for creators. The intent is already there."

3. Growing importance of understanding human psychology and conversion strategies in writing and marketing, as AI generates generic content — marketers are studying psychological triggers to stand out in an AI-saturated landscape; (~2 comments)

> "Instead of trying to write more with AI, I've been learning how to write in a way that sounds human. I'm talking about actual psychology—the stuff that makes a human being stop scrolling and actually pull out their credit card."

4. Increasing use of crypto (specifically USDT) as a payment method for remote work, particularly in countries like Portugal where it can be easily spent — freelancers are adopting stablecoins for cross-border payments, reducing friction with traditional banking; (~3 comments)

> "Getting paid in USDT isn't crazy anymore tbh. In Portugal you can literally hold stables and spend them directly. I'm in Lisbon and use Oobit to tap and pay at Continente and cafes."

Established Trends

1. AI-generated content and titles, specifically the 'What I wish I knew before X' format — a recurring headline style in business-focused subreddits that has spread rapidly over the past weeks; (~4 mentions / ~10 upvotes)

> "Seems it started this week in this sub and other biz subs have anyone noticed? Last week it was all about no capital letters in title or body. Now is the: what I wish I knew"

2. Increasing use of AI in content creation and business automation — from generating blog posts to creating personalized outreach videos, AI is being woven into end-to-end workflows; (~5 comments)

> "Our team built a automated personalized outreach system where using N8N we scrapes a lead's website, generates a Loom-style video using HeyGen for the talking avatar and ElevenLabs for my cloned voice, then stitches in dynamic website screenshots and sends it automatically via email! It's crazy how good the actual end video is considering it's all automation!"

3. Debate around the political nature of children's educational content and public figures — ongoing discussion about whether basic human decency in kids' media is inherently political; (~5 comments)

> "Mr Rogers was political when he dipped his toes into a wading pool with Officer Clemmons, who was black, as pools across the country were shutting down because of integration."

4. Increasing use of AI in various aspects of business and content creation, with a focus on its potential and pitfalls — creators are experimenting with AI while warning about scams and low-quality output; (~10 comments)

> "Honestly \"three month test period\" plus \"crypto\" is what is raising up red flags for me, and all the crypto bros in the comments are kinda blind to not see how this is an obvious scam."

5. Rise of side hustles and the search for financial independence, particularly among younger individuals — many are pursuing supplemental income streams to offset rising living costs and student debt; (~10 comments)

> "i am a beginner wanting to use my academic skills to support my college fees but somehow nothing works"

6. Growing demand for remote work opportunities, especially in specific regions like Canada and Southeast Asia — workers in these regions report difficulty finding legitimate remote roles that accept their location; (~4 comments)

> "So i have previous experience in 2 companies concentrix and tech Mahindra. (Do not recommend as I was unlawfully massed fired from both) but I am asking if anyone knows of any other companies or usa companies that accept us Canadians?"

7. The shift towards digital products and online services as viable income streams — creators are moving from generic templates to niche-specific solutions that solve a named problem for a named person; (~4 comments)

> "Digital products work best when the value is obvious and the use case is specific. Generic

templates rarely sell well — the ones that do solve a named problem for a named person. 'Freelancer invoice tracker' beats 'business finance template.' 'Content calendar for solo creators' beats 'content planning system.'"

8. The impact of social media algorithms and AI-generated content on creator monetization and authenticity — users warn that relying on AI slop hurts long-term earnings and trust; (~5 comments)

> "Also it doesn't matter if you ask questions or not, but please avoid AI Slop videos/content. It won't work, you won't make money with it and if you do, its for a short time only."

9. The increasing politicization of everyday issues and public figures, leading to backlash for expressing basic human values — audiences are quick to label apolitical statements as political, creating a chilling effect on neutral discourse; (~10 comments)

> "It is disgusting that this is not already the base view of society. People like Mr. Rogers and Ms. Rachel are needed more than ever."

Common Questions

1. May I ask what led you to do this? I just cannot wrap my head around how someone thinks this would not be detected.

- Frequency: ~10 times across threads
- Why it goes unanswered: The question probes motives behind covert actions, which are highly situational and rarely disclosed openly.
- Best partial answer seen in comments (if any)

> "May I ask what led you to do this? I just cannot wrap my head around how someone thinks this would not be detected."

2. What's the story behind your product idea?

- Frequency: ~5 times across threads
- Why it goes unanswered: Each creator's journey is unique, so answers vary widely and resist generalization.
- Best partial answer seen in comments (if any)

> "I'm hoping to hear some of your stories or insights on how you came up your ideas. I'm especially curious to hear how it started out for you, any setbacks you had, any strategies you tried when creating your product."

3. Has anyone managed to find decent extra income that actually fits around teaching?

- Frequency: ~5 times across threads
- Why it goes unanswered: Teaching schedules differ by region and institution, making universal solutions elusive.
- Best partial answer seen in comments (if any)

> "Has anyone found something that actually works around a full teaching schedule? Would love to hear what others are doing."

4. Best transcription jobs in 2026?

- Frequency: ~5 times across threads
- Why it goes unanswered: Job markets shift rapidly, and reliable, up-to-date listings are scarce or proprietary.
- Best partial answer seen in comments (if any)

> "Anyone have recommendations for transcription jobs for 2026? I'm sure it's a loaded question since people may not want to share where they work since it would increase competition but thought I'd try anyway."

5. What exactly are you implying? That Israel is a helpless puppet-state that serves to do the United State's bidding? Do you believe Israel has no influence over US domestic policy?

- Frequency: ~5 times across threads
- Why it goes unanswered: The topic is politically charged, leading to polarized opinions rather than factual consensus.
- Best partial answer seen in comments (if any)

> "What exactly are you implying? That Israel is a helpless puppet-state that serves to do the United State's bidding? Do you believe Israel has no influence over US domestic policy?"

6. What is modsquad?

- **Frequency: ~4 times across threads**
- **Why it goes unanswered: The term refers to a niche platform with limited public documentation, causing confusion.**
- **Best partial answer seen in comments (if any)**

> "What is modsquad?"

7. How to sell a service to a business that needs it but it's not critical to their operations?

- **Frequency: ~4 times across threads**
- **Why it goes unanswered: Selling non-essential services requires tailored value propositions that depend on the client's specific pain points.**
- **Best partial answer seen in comments (if any)**

> "How do I sell my service in this scenario?"

8. What are some good side hustles opportunities that can be done in Southeast Asia?

- **Frequency: ~4 times across threads**
- **Why it goes unanswered: Opportunities vary by country, language, and local regulations, making one-size-fits-all advice ineffective.**
- **Best partial answer seen in comments (if any)**

> "What are some good side hustles opportunities that can be done in Southeast Asia?"

9. How do I achieve financial freedom?

- **Frequency: ~3 times across threads**

- **Why it goes unanswered:** “Financial freedom” means different things to different people, and paths depend on income, debt, and risk tolerance.
- **Best partial answer seen in comments (if any)**

> "i've grew up poor all my life, and i don't even want to live a lavish lifestyle. i just wanna afford my basic needs and be happy :("

10. What certificates/online courses are good for online jobs, especially typing/no phone calls?

- **Frequency:** ~3 times across threads
- **Why it goes unanswered:** Credibility of online certifications varies widely, and employers often prioritize demonstrable skills over paper credentials.
- **Best partial answer seen in comments (if any)**

> "I'm wanting to find a decent online job. I'm gonna take a course online to get a certificate for said job. I prefer typing/no phone calls, so does anyone know a good certificate to gain to be eligible for that field?"

11. How long does it take to be invited to Facebook monetization program?

- **Frequency:** ~3 times across threads
- **Why it goes unanswered:** Invitation criteria are opaque and change frequently, leaving creators to rely on anecdotal timelines.
- **Best partial answer seen in comments (if any)**

> "When can I expect to be invited for content monetisation? I'm UK based, but my audience seems to be mostly US based. Is there a way to speed up the process?"

12. What's the most realistic passive income stream for beginners today?

- **Frequency:** ~3 times across threads
- **Why it goes unanswered:** “Passive” is often misrepresented; most streams require upfront work or maintenance that beginners underestimate.

- **Best partial answer seen in comments (if any)**

> **"What's the most realistic passive income stream for beginners today?"**

13. How much time do you all actually devote to content creation?

- **Frequency: ~3 times across threads**
- **Why it goes unanswered: Time tracking is personal and inconsistent, so self-reported figures vary widely and lack verification.**

- **Best partial answer seen in comments (if any)**

> **"How much time do you all actually devote to content creation?"**

14. people who studied to become english teachers: did it help you get a job in something else?

- **Frequency: ~3 times across threads**
- **Why it goes unanswered: Career transitions depend on individual networking, geography, and the specific alternative field pursued.**

- **Best partial answer seen in comments (if any)**

> **"people who studied to become english teachers: did it help you get a job in something else?"**

15. What makes a side hustle feel trustworthy to you, not just promising?

- **Frequency: ~3 times across threads**
- **Why it goes unanswered: Trustworthiness hinges on transparency, proof of results, and personal risk tolerance—factors that are subjective.**

- **Best partial answer seen in comments (if any)**

> **"What makes a side hustle feel trustworthy to you, not just promising?"**

16. How do I make money to fund my driving lessons?

- **Frequency:** ~2 times across threads- **Why it goes unanswered:** The answer depends on local wage rates, available time, and the learner's existing skill set.
- **Best partial answer seen in comments (if any)**

> "each lesson is £35 I want 2 lessons a week so that's £70 per week I need to make, but honestly 1 a week is better than none a week."

17. How do I turn content creation skills (writing, voiceovers, speaking) into a consistent income stream?

- **Frequency:** ~2 times across threads
- **Why it goes unanswered:** Monetization routes (ads, sponsorships, products) differ by niche, audience size, and platform algorithms.
- **Best partial answer seen in comments (if any)**

> "I'm looking for a clear and practical roadmap to turn my content creation skills into a consistent income stream."

18. What's the best way to turn 2-3 daily hours into steady side income?

- **Frequency:** ~2 times across threads
- **Why it goes unanswered:** Effectiveness depends on the individual's existing skills, market demand, and the ability to scale within limited time windows.
- **Best partial answer seen in comments (if any)**

> "whats up r/passive_income so i've got this window of about 2-3 hours every night after my day job and wondering how to best use it for building some extra income streams."

19. What side hustles can a university student start in Egypt with very little money?

- **Frequency:** ~2 times across threads

- **Why it goes unanswered:** Local economic conditions, currency constraints, and regional platform availability heavily influence feasibility.
- **Best partial answer seen in comments (if any)**

> "I'm a university student in Egypt and I'm trying to find ways to make money while studying. The problem is that I don't have much capital to start with."

20. Can you pay your rent or mortgage using crypto? If not, this payment method is unacceptable.

- **Frequency:** ~2 times across threads- **Why it goes unanswered:** Crypto volatility, regulatory uncertainty, and limited landlord acceptance make this a risky and rarely viable option.
- **Best partial answer seen in comments (if any)**

> "Can you pay your rent or mortgage using crypto? If not, this payment method is unacceptable."

21. Anything I can do remotely ?

- **Frequency:** ~2 times across threads
- **Why it goes unanswered:** Remote work eligibility hinges on industry, employer policies, and the worker's specific qualifications or equipment.
- **Best partial answer seen in comments (if any)**

> "Anything I can do remotely ?"

22. What the best unexpected side hustle you've done?

- **Frequency:** ~2 times across threads
- **Why it goes unanswered:** "Unexpected" side hustles are highly personal and often stem from serendipitous skill-market matches.
- **Best partial answer seen in comments (if any)**

> "What the best unexpected side hustle you've done?"

23. Could you share what apps you use for outdoor event bookings?

- Frequency: ~2 times across threads
- Why it goes unanswered: App preference varies by event type, geographic region, and desired features (payment processing, calendar sync, etc.).
- Best partial answer seen in comments (if any)

> "Could you share what apps you use for outdoor event bookings?"

24. When did your "passive income" actually become low-maintenance?

- Frequency: ~2 times across threads
- Why it goes unanswered: The transition to low-maintenance depends on upfront automation, outsourcing, and the specific business model's maturity.
- Best partial answer seen in comments (if any)

> "When did your "passive income" actually become low-maintenance?"

25. What are you guys doing for passive income?

- Frequency: ~2 times across threads
- Why it goes unanswered: Strategies differ widely based on capital, risk appetite, and expertise, making aggregation unhelpful.
- Best partial answer seen in comments (if any)

> "What are you guys doing for passive income?"

26. What's a small decision you made that completely changed the trajectory of your life?

- Frequency: ~2 times across threads

- **Why it goes unanswered:** Life-altering decisions are deeply personal and context-dependent, resisting universal patterns.

- **Best partial answer seen in comments (if any)**

> "What's a small decision you made that completely changed the trajectory of your life?"

27. is it possible to make like \$7.00 USD an hour doing surveys?

- **Frequency:** ~2 times across threads

- **Why it goes unanswered:** Survey pay rates fluctuate by platform, demographic targeting, and survey length, making guarantees impossible.

- **Best partial answer seen in comments (if any)**

> "is it possible to make like \$7.00 USD an hour doing surveys?"

28. How important is your top-level domain (.com, .dev, .app) for a webapp?

- **Frequency:** ~2 times across threads

- **Why it goes unanswered:** Impact depends on audience perception, branding goals, and whether the TLD conveys trust or relevance in a given niche.

- **Best partial answer seen in comments (if any)**

> "How important is your top-level domain (.com, .dev, .app) for a webapp?"

29. Would you pay for a Meta ads intelligence tool?

- **Frequency:** ~2 times across threads

- **Why it goes unanswered:** Willingness to pay hinges on perceived ROI, existing ad spend, and the availability of free alternatives.

- **Best partial answer seen in comments (if any)**

> "would you pay for it?"

30. Got offered remote work but they want to pay in crypto for test period, should I take it?

- **Frequency: ~1 times across threads- Why it goes unanswered: The decision hinges on personal risk tolerance, crypto literacy, and the stability of the offered token.**
- **Best partial answer seen in comments (if any)**

> **"Got offered remote work but they want to pay in crypto for test period, should I take it?"**

31. Is This A Good Idea For A Ugly Guy?

- **Frequency: ~1 times across threads**
- **Why it goes unanswered: Attractiveness is subjective, and success in social or dating contexts relies on myriad factors beyond appearance.**
- **Best partial answer seen in comments (if any)**

> **"Is This A Good Idea For A Ugly Guy?"**

32. What skill did you acquire online that actually helped you start working remotely?

- **Frequency: ~1 times across threads- Why it goes unanswered: Skill utility varies by industry, job requirements, and the learner's ability to apply knowledge practically.**
- **Best partial answer seen in comments (if any)**

> **"What skill did you acquire online that actually helped you start working remotely, even if the pay was small at first?"**

33. How to decide if a product idea is worth building, especially with limited entrepreneurial and coding experience?

- **Frequency: ~1 times across threads**
- **Why it goes unanswered: Validation requires market testing, prototyping, and feedback loops that are inaccessible to beginners without resources.**
- **Best partial answer seen in comments (if any)**

> "But before I invest months of my life into this, how can I determine whether this idea is actually worth pursuing?"

34. What jobs are online?

- Frequency: ~1 times across threads
- Why it goes unanswered: The online job landscape is vast and constantly evolving, making exhaustive lists impractical.
- Best partial answer seen in comments (if any)

> "UH WHAT CAN I DO ONLINE?"

35. What should I sell on eBay as a beginner reseller?

- Frequency: ~1 times across threads
- Why it goes unanswered: Profitable niches depend on local sourcing, shipping costs, and fluctuating buyer demand.
- Best partial answer seen in comments (if any)

> "WHAT SHOULD I DO!? My dad wants me to get some money to help sustain myself in hopes of making me be independent, so please help me choose."

Sentiment Analysis

Overall Mood

The community exhibits a mixed emotional landscape, marked by deep frustrations around personal loss, family conflict, and systemic barriers, yet buoyed by optimism around entrepreneurial side hustles, creative monetization, and supportive relationships. Numerous complaints about pet euthanasia decisions (~8 comments, ~31800 upvotes), rude family members (~4 comments, ~13300 upvotes), and unsupportive parents (~4 comments, ~7450 upvotes) coexist with praise for mobile app side hustles (~3 mentions, ~340 upvotes), wedding tech product strategy (~4 mentions, ~500 upvotes), and the bond with one's mother (~5 comments, ~7450 upvotes). Overall tone is cautiously hopeful, with users actively seeking practical solutions while venting about systemic pain points.

Positive Signals

1. Mobile app side hustles — users celebrate scalable income from niche automation tools and subscription models.

> "Right now Sober Tracker alone makes over 50% of my income. The newest app, Supplement Tracker, started earning within 2 weeks of launch." — (~3 mentions, ~340 upvotes)

2. Wedding tech product strategy — founders find success by solving hyper-specific pain points with one-time event passes instead of subscriptions.

> "Nobody wants to pay monthly for something they need for 6 months. We almost launched with a SaaS model. Switched to one-time event passes (\$69-\$149) and conversions jumped immediately." — (~4 mentions, ~500 upvotes)

3. Finding product-market fit — creators stress that messaging the problem, not the feature, drives resonance and rapid adoption.

> "I now have around 14 apps live on both iOS and Android. For the longest time I was barely making \$10/day because I was selling features for like \$5 one-time. A month ago I switched everything to subscriptions and it changed everything. Revenue jumped almost immediately." — (~2 mentions, ~350 upvotes)

4. Time tracking for productivity — logging hours reveals hidden time sinks and helps prevent burnout.

> "about an hour every day i was doing \"research\" that was really just reading random stuff online. social media breaks that were way longer than i thought (i'd have guessed maybe 20 min a day but it was closer to 2 hours)." — (~1 mention, ~82 upvotes)

5. Making money from books — niche passion projects on platforms like KDP can break even and build authority.

> "I wrote a book mostly as a passion project and my goal was just to break even by selling it to friends or people I meet. It is on a pretty niche topic (visualization/ guided imagery for elite athletes), so my expectations were pretty low." — (~1 mention, ~111 upvotes)

6. Starting a new business — pivoting to a clear, urgent problem (e.g., wedding seating chaos) unlocks immediate traction.

> "We're making money in the wedding industry and here's what nobody told us before we started." — (~2 mentions, ~500 upvotes)

7. Ms. Rachel's educational content / positive influence — creators cite her moral clarity and educational value as a counter-toxic force in online spaces.

> "It is disgusting that this is not already the base view of society. People like Mr. Rogers and Ms. Rachel are needed more than ever." — (~2 mentions, ~9 upvotes)

8. Restoring old photos for others — AI-assisted photo restoration turns a hobby into a reliable side income.

> "Helped someone restore their grandma's photo for free, somehow turned it into

\$800/month." — (~1 mention, ~800/month implied)

9. Turning hobbies into income — leveraging niche craftsmanship (e.g., garden ornaments) can scale to mortgage-level revenue.

> "I found a garden ornament I liked but I could only buy them on aliexpress 10 at a time. Thought oh well, worst case scenario is everyone I know gets one for Christmas! 4 months later I was on eBay and amazon, 8 months later it paid my mortgage (some months)." — (~1 mention, ~66 upvotes)

10. The bond with one's mother — emotional reliance on maternal comfort surfaces repeatedly amid economic and geopolitical stress.

> "All I see if a little boy happy to see his mommy ☺☺☺ Yes I know he's grown, but that's HIS mommy. And he is her BABY. 😊☺☺ At 22 I cry everytime I see my mom now because this economy and geopolitics got me needing my mommy more and more everyday. Just the comfort of falling into her arms and letting it all out is the best feeling in the world." — (~1 mention, ~65 upvotes)

11. The idea of flipping items for profit — restoring furniture or collectibles creates both charitable impact and profit streams.

> "I collect furniture to restore or just change the character or use. I am considering donating the finished pieces to local animal rescues. I have also considered a fund for those that need financial help with deadly diseases like Parvo. Super expensive to treat. It seems as though my fosters are special needs or close to death when I find them so I know how hard it is. In the meantime it's just another hobby." — (~1 mention, ~9 upvotes)

12. The concept of building long-term, stable businesses — creators value durability over quick wins, emphasizing repeatable processes.

> "I have been in social media industry for over 18+ years and earning on social media for over 14 years. I'll answer as many questions as possible." — (~1 mention, ~14 years implied)

13. The value of automation in business efficiency — transparent automated decision logs build trust and speed up scaling.

> "The future moment for me: watching an automated decision log show not just that something happened, but the exact reasoning chain. Agent received trigger, checked criteria X, applied rule Y, took action Z, logged outcome. All visible after the fact." — (~1 mention, ~8 upvotes)

14. The emotional connection to homemade food and family reunions — shared meals and maternal cooking are recurring sources of comfort and identity.

> "All I see if a little boy happy to see his mommy ☺☺☺ Yes I know he's grown, but that's HIS mommy. And he is her BABY. 😊☺☺ At 22 I cry everytime I see my mom now because this economy and geopolitics got me needing my mommy more and more everyday. Just the comfort of falling into her arms and letting it all out is the best feeling in the world." — (~1 mention, ~65 upvotes)

Negative Triggers
1. Euthanizing pets — agonizing over whether to end a pet's life while they still appear normal, especially before travel.

> "I feel like I'm choosing between: - risking her suffering later without me there - or ending her life while she still seems "okay"" — (~8 comments, ~31800 upvotes)

2. Rude family members — relatives masking criticism in a foreign language, assuming others don't understand, causing deep discomfort.

> "So I sat there for about forty five minutes listening to this woman quietly critique everything from my mom's cooking to the size of our living room to what she apparently considers my brother's disappointing career choices. All with a smile on her face pointed at the people she was talking about." — (~4 comments, ~13300 upvotes)

3. Unsupportive parents — parents betraying trust by sharing sensitive pregnancy information with a favored sibling, then lying about it.

> "I recently found out that my mom told my sister anyway, and apparently did so right away. Then she lied about it for around three months. She only admitted it after I explained how much it meant to me that my sister not be included in my pregnancy information. This really hurt me, not just because of the pregnancy itself, but because it feels like the same old pattern of my sister's feelings mattering more than mine." — (~4 comments, ~7450 upvotes)

4. Unwanted gifts — recipients' honest feedback about ill-chosen presents is met with confusion or hostility from the giver.

> "My excitement was short lived, it turned into sadness very soon. Here is a summary of how the gift exchange went down: I bought him some other smaller things but put the ticket confirmation in an envelope with the card I made for him. He opens the envelope and I'm met with a "uhhhhhh.. what?"" — (~5 comments, ~5660 upvotes)

5. Landlords installing smart locks without consent — remote access and tracking enable surveillance and raise privacy and illegal eviction concerns.

> "If they have access to the app, they can remotely lock/unlock the door. As well as see when the door is locked/unlocked. Essentially trolling to see when you come and go. I'd be pissed." — (~15 comments, ~900 upvotes)

6. Bank 2FA issues — mandatory app-based 2FA locks out users whose phones cannot run the latest OS, creating accessibility barriers.

> "a few weeks back- they decided to lock anyone who didn't have the newest IOS version installed on their phone out \"until they update\"." — (~8 comments, ~610 upvotes)

7. Smoking on airplanes — covert smoking in non-smoking areas frustrates passengers and crew, with disbelief that it could go undetected.

> "May I ask what led you to do this? I just cannot wrap my head around how someone thinks this would not be detected." — (~10 comments, ~500 upvotes)

8. Managing sudden wealth — rapid influx of money triggers a "poor mindset" leading to

reckless spending and eventual financial loss.

> "I had what we call in France a poor mindset, this is when you grow up with nothing and get so much money that fast, it drives you crazy, you believe you won the lottery and thought that money would never stop coming." — (~1 comment, ~386 upvotes)

9. Poor marketing onboarding — founders' tribal knowledge lives only in their heads, causing frustration when new hires lack context.

> "You have context that lives nowhere. Not in docs, not in Slack, not in your CRM. It's just in your head. And you'll get frustrated when they don't \"get it\" even though you never actually transferred any of it." — (~4 comments, ~120 upvotes)

10. Monetization of goods — shift from ownership to leased/subscription models extracts more revenue while eroding user control and data privacy.

> "Entire things you used to own are now leased to you for more money and your private data—software, music, video games, features in your new car, etc. It's actually shameful, but difficult to fight." — (~7 comments, ~110 upvotes)

11. Burnout from overwork — extreme schedules persist despite productivity systems, eroding personal relationships and health.

> "i'd wake up at 5am, do a morning routine, work on client stuff before my commute, come home at 5:30 and basically work until midnight. some nights my wife was already asleep when i came to bed. she'd make dinner and eat alone... honestly more often than i want to admit." — (~2 comments, ~82 upvotes)

12. Political manipulation and lies — proposed policy changes (e.g., automatic draft registration) are seen as veiled power grabs disguised as reform.

> "This isn't about Iran, and it's not to start a draft. It's to replace the stupid voluntary draft registration that every male is supposed to fill out when they turn 18 and replace it with an automatic system." — (~5 comments, ~67 upvotes)

13. Antisemitic ideology — rhetoric that shifts blame for US actions onto Israel is recognized as a thinly veiled antisemitic trope.

> "Anytime someone removes responsibility from the US by claiming they are under the influence of Israel (as if the US didn't have hundreds of years of colonial and war-mongering bs under their own name), I start wondering if they're just peddling antisemitic ideology. They usually are." — (~5 comments, ~66 upvotes)

14. Dirty kitchen habits — sponges and cloths trap bacteria and odors, creating a vicious cycle of re-contamination without proper drying.

> "Sponge is dirty, boils sponge to clean. Now pot is dirty, use sponge to clean pot. Goddamn it sponge is dirty again. You're now trapped in a vicious cycle of sponge and pot cleaning" — (~5 comments, ~66 upvotes)

15. AI-generated content lacking human touch — fully automated output feels robotic, fails to engage, and damages long-term credibility.

> "Also it doesn't matter if you ask questions or not, but please avoid AI Slop videos/content. It won't work, you won't make money with it and if you do, its for a short time only." — (~5 comments, ~200 upvotes)

Nuanced / Conflicted Areas

- **AI in content creation** — users praise automation for efficiency (~3 mentions, ~340 upvotes) but criticize lack of human touch and authenticity (~5 comments, ~200 upvotes).

> "Our team built a automated personalized outreach system where using N8N we scrapes a lead's website, generates a Loom-style video using HeyGen for the talking avatar and ElevenLabs for my cloned voice, then stitches in dynamic website screenshots and sends it automatically via email! It's crazy how good the actual end video is considering it's all automation!"

> "Also it doesn't matter if you ask questions or not, but please avoid AI Slop videos/content. It won't work, you won't make money with it and if you do, its for a short time only."

- **Side hustles** — celebrated as a path to income and freedom (~6 mentions, ~350 upvotes) yet warned about hidden effort and burnout (~3 comments, ~9 upvotes).

> "Right now Sober Tracker alone makes over 50% of my income. The newest app, Supplement Tracker, started earning within 2 weeks of launch."

> "What I'm noticing now is that nothing feels truly passive yet. It's more like everything requires a low but constant level of involvement, and when I try to scale even slightly, that "low effort" quickly compounds into something that needs daily attention."

- **Remote work** — desired for flexibility and opportunity (~4 mentions, ~250 upvotes) but hampered by scams, geographic restrictions, and ATS barriers (~5 comments, ~250 upvotes).

> "I'm looking for a clear and practical roadmap to turn my content creation skills into a consistent income stream."

> "Well it kinda is lazy if every second post is what online jobs are Available online. It clogs up not only this feed but the home feed also. And yes I am calling them lazy because how else do you find a regular job nowadays? Through carrier pigeon? Nah, online. Hard to ignore something that's always popping up on my feed."

Viral Hooks

1. "I may have to put my 19 ye cat down before a trip today... but she still seems normal"

***Why it works:** Captures the heart-wrenching dilemma of euthanizing a pet that appears healthy, triggering guilt and urgency in pet owners.

(~1 comment), (~31804 upvotes)

2. "AITJ for refusing to pretend I don't speak Spanish at my own family dinner?"

***Why it works:** Highlights the satisfaction of confronting covert racism in one's own language, delivering a cathartic victory over silent judgment.

(~1 comment), (~13340 upvotes)

3. "WIBTAH for changing my baby's name after my mom secretly told my sister I was pregnant?"

***Why it works:** Explores betrayal of trust and the urge to reclaim agency after family deception, resonating with anyone who's felt sidelined.

(~1 comment), (~7453 upvotes)

4. "AITA for not buying my boyfriend another birthday gift after he rejected the original present?"

***Why it works:** Taps into the sting of ungrateful receivers and the question of whether effort deserves reciprocation.

(~1 comment), (~5669 upvotes)

5. "We're making money in the wedding industry and here's what nobody told us before we started"

***Why it works:** Promises insider, counter-intuitive wisdom about a traditionally emotion-driven market, attracting entrepreneurs seeking an edge.

(~1 comment), (~519 upvotes)

6. "How I lost \$1.5M in less than 2 years"

***Why it works:** A shocking loss story that warns against sudden-wealth mindset, drawing readers who fear financial self-sabotage.

(~1 comment), (~386 upvotes)

7. "Hit \$1K/month building mobile apps on the side!"

***Why it works:** Shows a realistic, attainable side-hustle milestone, motivating aspiring developers with proof of modest scaling.

(~1 comment), (~351 upvotes)

8. "Hired my first full-time marketer after doing everything myself for 14 months. What I wish I knew before signing the offer letter."

***Why it works:** Reveals the hidden cost of undocumented founder knowledge, speaking to

founders scaling beyond solo work.

(~1 comment), (~128 upvotes)

9. "I tracked every hour for 7 days and found out why I kept burning out"

***Why it works:** Turns abstract burnout into concrete, surprising time-audit revelations that promise actionable fixes.

(~1 comment), (~82 upvotes)

10. "Worst Training & Zero Support – My Concentrix Experience"

***Why it works:** Vividly depicts on-the-job neglect, eliciting empathy and warning others about toxic training environments.

(~1 comment), (~129 upvotes)

11. "If had no followers, no email list, and no idea what to sell. Here's the exact 4-week process i would use to make my first \$1k online."

***Why it works:** Offers a concrete, step-by-step roadmap from absolute zero, appealing to beginners overwhelmed by choice.

(~1 comment), (~69 upvotes)

12. "Helped someone restore their grandma's photo for free, somehow turned it into \$800/month"

***Why it works:** Demonstrates how a simple act of kindness can snowball into a reliable income stream, inspiring altruistic entrepreneurs.

(~1 comment), (~66 upvotes)

13. "Is This A Good Idea For A Ugly Guy?"

***Why it works:** Challenges look-based dating advice with a provocative title that invites debate and self-reflection.

(~1 comment), (~67 upvotes)

14. "Got offered remote work but they want to pay in crypto for test period, should I take it?"

***Why it works:** Captures the modern gig-economy tension between opportunity and risk, speaking to workers wary of volatile pay.

(~1 comment), (~61 upvotes)

15. "I Stopped Using Social Media and My Earnings on Fanvue Doubled"

***Why it works:** Flips the assumption that constant posting drives revenue, showing that stepping back can boost income.

(~1 comment), (~0 upvotes)

16. "First Paying customer unlocked"

***Why it works:** Celebrates the pivotal validation moment when a side hustle earns its first

real sale, fueling hope for early-stage creators.

(~1 comment), (~0 upvotes)

17. "The sleepless nights have started"

***Why it works:** Signals the onset of entrepreneurial stress, resonating with anyone who's felt the weight of a new venture.

(~1 comment), (~0 upvotes)

18. "Your product doesn't matter! Here is the proof!"

***Why it works:** Provocatively claims that execution beats idea, attracting builders tired of overhyped concepts.

(~1 comment), (~0 upvotes)

19. "I found a weird truck by the S.S. Anne..."

***Why it works:** A quirky, mysterious discovery that promises an offbeat story, tapping into curiosity and nostalgia.

(~1 comment), (~0 upvotes)

20. "posted the same content on YouTube and TikTok for 60 days, the difference surprised me"

***Why it works:** Reveals platform-specific algorithmic truths, useful for creators deciding where to focus effort.

(~1 comment), (~0 upvotes)

21. "Tutor rejection"

***Why it works:** Documents the discouraging grind of breaking into online tutoring, validating the frustration of qualified beginners.

(~1 comment), (~10 upvotes)

22. "Just made \$3000 this week - DON'T GIVE UP"

***Why it works:** A triumphant, short-term win that fuels perseverance during lean periods.

(~1 comment), (~0 upvotes)

23. "A promising side hustle is not the same as a trustworthy one"

***Why it works:** Distinguishes flashy potential from reliable sustainability, guiding newcomers toward durable choices.

(~1 comment), (~0 upvotes)

24. "When did your "passive income" actually become low-maintenance?"

***Why it works:** Questions the myth of truly passive income, inviting honest discussion about hidden upkeep.

(~1 comment), (~0 upvotes)

25. "What's a small decision you made that completely changed the trajectory of your life?"

***Why it works:** Invites storytelling about pivotal micro-choices, appealing to readers

seeking inspiration for change.

(~1 comment), (~0 upvotes)

26. "I have been in social media industry for over 18+ years and earning on social media for over 14 years. I'll answer as many questions as possible."

***Why it works:** Offers seasoned expertise and open-door Q&A, drawing learners eager for veteran insight.

(~1 comment), (~0 upvotes)

27. "Built a side project to solve a problem I had... now I'm wondering if it could actually launch it"

***Why it works:** Captures the leap from personal tool to potential product, motivating builders to validate their scratches-your-own-itch ideas.

(~1 comment), (~0 upvotes)

StartupIdeas

1. HealthHabit Tracker Suite — A subscription-based suite of mobile apps for tracking health habits like sobriety, supplements, and anxiety.

The Opportunity: Users struggle to monetize health habit apps with one-time purchases; switching to subscriptions drives immediate revenue growth.

Validation Evidence: ~3 mentions / ~340 upvotes

> "I now have around 14 apps live on both iOS and Android. For the longest time I was barely making \$10/day because I was selling features for like \$5 one-time. A month ago I switched everything to subscriptions and it changed everything. Revenue jumped almost immediately."

Suggested Model: SaaS subscription (monthly/annual per app or bundle)

Defensibility: App store presence, user data, brand loyalty, network of apps cross-promoting.

Risk / Challenge: User acquisition cost, competition from free apps, need for continuous content updates.

2. WedPass — One-time event pass for wedding tech tools (seating charts, guest management) avoiding subscription fatigue.

The Opportunity: Wedding industry rejects recurring fees for short-term needs; one-time passes boost conversions.

Validation Evidence: ~4 mentions / ~500 upvotes

> "Our best marketing isn't feature lists, it's describing the seating chart nightmare ("divorced parents, feuding aunts, the uncle nobody wants near the mic") and people going "oh my god YES."

Suggested Model: Transactional sales (one-time purchase per event) or tiered event passes.

Defensibility: Deep understanding of wedding pain points, brand as solution to specific nightmare scenarios.

Risk / Challenge: Seasonal demand, need to continuously update features for evolving wedding trends.

3. NicheProblem Guide — Low-cost digital guide solving a repeatedly asked community problem.

The Opportunity: Frequent recurring questions indicate a ready market for affordable how-to guides.

Validation Evidence: ~2 mentions / ~27 upvotes

> "Search for questions that start with \"how do I\", \"why can't I\", \"what's the best way to\". Look for the same question being asked repeatedly. When you see the same frustration coming up 10, 15, 20 times that's your product."

Suggested Model: One-time digital product sale (e.g., Gumroad, Teachable) priced \$17-\$47.

Defensibility: SEO targeting of specific question phrases, first-mover content quality.

Risk / Challenge: Market saturation if many similar guides emerge; need to keep content updated.

4. **NicheAthlete

Educational & How-To

1. [Side hustles and mobile app development strategies] — Learn how developers turned simple habit-tracking apps into reliable side-income streams, with one app generating over half their revenue within weeks (~3 comments, ~351 upvotes).
2. [Onboarding best practices for new hires in startups] — Discover how transferring implicit founder knowledge into documented processes reduces frustration and accelerates new-hire productivity (~4 comments, ~128 upvotes).
3. [Marketing strategies for niche industries (e.g., weddings)] — See why swapping a subscription model for one-time event passes dramatically boosted conversions in the wedding market (~4 comments, ~519 upvotes).
4. [Productivity hacks and time management for entrepreneurs] — Uncover how tracking daily hours revealed hidden time sinks like prolonged "research" that actually consumed two hours per day (~2 comments, ~82 upvotes).
5. [Strategies for making first \$1k online from scratch] — Follow a proven 4-week process that turned a simple bulk-purchase garden ornament into a mortgage-paying side business (~1 comment, ~66 upvotes).

Psychological & Narrative

1. [Pet euthanasia decisions and coping with grief] — Explore the agonizing choice between prolonging a pet's apparent wellness and preventing future suffering, a dilemma voiced by thousands (~8 comments, ~31804 upvotes).
2. [Interpersonal conflict resolution with difficult family members] — Witness a calm, Spanish-language rebuttal that disarmed a critical relative and restored peace at a family gathering (~4 comments, ~13340 upvotes).
3. [Gift-giving etiquette and managing expectations] — Understand how mismatched expectations around a concert ticket sparked a heated exchange, highlighting the importance of truly knowing the recipient's tastes (~5 comments, ~5669 upvotes).
4. [Personal finance: managing sudden wealth and avoiding pitfalls] — Hear how a "poor mindset" can turn a windfall into reckless spending and loss, a cautionary tale for anyone experiencing rapid wealth (~1 comment, ~386 upvotes).
5. [The emotional aspects of pet ownership, particularly end-of-life decisions] — Reflect on the regret of waiting too long to euthanize a suffering pet and the relief of acting sooner to spare both animal and owner further pain (~1 comment, ~131 upvotes).

Critical & Contrarian

1. [The shift from ownership to subscription models in various industries] — Examine how everyday goods are being converted into leased services that extract more money and data, a trend many find shameful yet hard to resist (~7 comments, ~117 upvotes).
2. [The ethics and legality of smart locks in rental properties: privacy, remote access, and tenant rights] — Learn why landlords' remote access to smart locks raises serious privacy concerns and potential illegal eviction risks (~15 comments, ~900 upvotes).
3. [The debate around antisemitism in political discourse and its impact on international relations] — See how accusations of dual loyalty are used to deflect criticism, revealing underlying antisemitic tropes in political rhetoric (~1 comment, ~66 upvotes).
4. [The role of political figures in children's education and the politicization of basic human decency] — Observe how media coverage of political figures often demands uncritical amplification, undermining nuanced discourse and public trust (~1 comment, ~67 upvotes).
5. [The reality of 'passive income' and the effort required to maintain it] — Realize that most so-called passive streams still demand regular attention, and scaling them can quickly erode their low-effort appeal (~2 comments, ~9 upvotes).

##Competitor Gaps

1. Bank mobile apps (2FA requiring latest OS)

What users say it gets wrong: ~8 comments / ~610 upvotes – banks lock users out of accounts if their phone doesn't support the newest OS version for mandatory app-based

2FA.

The gap: Accessible authentication that works on older devices or offers fallback methods without forcing upgrades.

> "a few weeks back- they decided to lock anyone who didn't have the newest IOS version installed on their phone out \"until they update\"."

Opportunity: A 2FA platform that supports SMS, hardware tokens, or web-based verification alongside app options, ensuring no user is locked out due to OS version.

2. Wedding tech SaaS platforms (subscription model aversion)

What users say it gets wrong: ~4 comments / ~500 upvotes – wedding industry customers reject monthly subscriptions for products needed only for a short event period.

The gap: Pricing models aligned with short-term, event-based needs rather than recurring fees.

> "Nobody wants to pay monthly for something they need for 6 months. We almost launched with a SaaS model. Switched to one-time event passes (\$69-\$149) and conversions jumped immediately."

Opportunity: Wedding-focused tools offered as one-time event passes or tiered pricing tied to the event date, eliminating the subscription barrier.

3. Subscription/lease models for goods (software, media, car features)

What users say it gets wrong: ~7 comments / ~110 upvotes – previously owned goods are now leased, costing more and harvesting private data, leaving users feeling they no longer truly own anything.

The gap: Transparent ownership options or fair-value lease-to-own alternatives that respect user control and data privacy.

> "Entire things you used to own are now leased to you for more money and your private data—software, music, video games, features in your new car, etc. It's actually shameful, but difficult to fight."

Opportunity: A marketplace or licensing model that lets users purchase perpetual licenses for software/media or buy out car feature leases after a set period, with clear data-use guarantees.

4. Customer service training programs

What users say it gets wrong: ~2 comments / ~20 upvotes – training is plagued by constant technical issues, and trainers panic instead of guiding trainees calmly.

The gap: Reliable, low-tech training environments and skilled instructors who can troubleshoot without transferring frustration to learners.

> "From day one of training, there were constant technical issues. Every single day someone had system problems. Instead of handling the situation calmly and professionally, the trainer would panic and get frustrated."

Opportunity: A training platform that simulates real-world scenarios with stable infrastructure and provides instructor coaching on de-escalation and problem-solving.

5. Manufacturers/prototype communication

What users say it gets wrong: ~4 comments / ~9 upvotes – suppliers make design changes without consulting the client, citing production difficulty, leading to distrust and unexpected outcomes.

The gap: Proactive collaboration loops where manufacturers seek client approval before altering prototypes.

> "When I asked my supplier, they said it's because these details are difficult to produce. Well I understand there's gap between design and production, while the point is, they didn't ask me anything before they made this decision!"

Opportunity: A prototype-management tool that enforces change-request workflows, version control, and automated client notifications for any deviation from spec.

6. Smart lock systems (landlord-installed without consent)

What users say it gets wrong: ~15 comments / ~900 upvotes – landlords install smart locks that enable remote locking/unlocking and tracking of tenant movements, raising privacy and illegal eviction concerns.

The gap: Tenant-controlled access logs and the ability to opt out of remote management features while maintaining security.

> "If they have access to the app, they can remotely lock/unlock the door. As well as see when the door is locked/unlocked. Essentially trolling to see when you come and go. I'd be pissed."

Opportunity: Smart locks with a tenant-only mode that disables landlord remote access and provides transparent, real-time access logs viewable only by the tenant.

7. Remote work job boards (Indeed, LinkedIn) – difficulty finding legitimate work
What users say it gets wrong: ~5 comments / ~250 upvotes – abundant advice exists, but it's hard to discern which remote-opportunity leads actually lead to real work amid scams.

The gap: Curated, vetted listings that signal legitimacy and provide clear skill-to-job matching for beginners.

> "I see a lot of advice about remote work and online skills, but it's hard to know what actually helps you get real work."

Opportunity: A job board that verifies employers, highlights entry-level friendly roles, and offers skill-assessment tools to help beginners prove competence.

8. Kitchen station cleanliness (shared workplace hygiene)

What users say it gets wrong: ~5 comments / ~250 upvotes – employees arrive to find dirty stations and uncleaned dishes from previous shifts, forcing extra prep work before they can start.

The gap: Enforced cleanup protocols or automated reminders that ensure stations are left ready for the next user.

> "That's the current problem I have with my expo station. I go in 30 mins early every day just to clean up after lunch shift."

Opportunity: A simple checklist or IoT-enabled station sensor that alerts the previous shift when cleaning is incomplete and rewards compliance.

9. Sponge/dishcloth maintenance (kitchen hygiene products)

What users say it gets wrong: ~5 comments / ~250 upvotes – sponges and dishcloths become dirty quickly, trapping users in a vicious cycle of cleaning the tool that then re-dirties immediately.

The gap: Materials or designs that resist odor/bacteria buildup or enable easy sanitization without special equipment.

> "Sponge is dirty, boils sponge to clean. Now pot is dirty, use sponge to clean pot. Goddamn it sponge is dirty again. You're now trapped in a vicious cycle of sponge and pot cleaning"

Opportunity: Antimicrobial sponges or dishcloths that can be sanitized in a standard microwave or dishwasher and stay fresh longer, reducing the cleaning-to-clean loop.

10. Passive income platforms/gurus (online courses, side-hustle advice)

What users say it gets wrong: ~5 comments / ~250 upvotes – many promoted passive-income ideas require ongoing low-level effort, making them not truly passive for beginners.

The gap: Truly low-maintenance income streams that deliver revenue with minimal ongoing oversight after setup.

> "What's the most realistic passive income stream for beginners today?"

Opportunity: A vetted library of passive-income models (e.g., digital product royalties, automated niche sites) with clear time-to-maintenance benchmarks and community-verified results.

11. Job postings lacking salary information (Indeed, LinkedIn)

What users say it gets wrong: ~2 comments / ~100 upvotes – employers omit salary ranges, wasting applicants' time and creating inequitable negotiation dynamics.

The gap: Mandatory salary transparency in listings to enable informed applications and fair offers.

> "Can we normalize putting salary info in job ads?" **Opportunity:** A job-search plugin or extension that flags or blocks postings without disclosed compensation and encourages employers to fill in salary fields.

12. Pet euthanasia decision-making (vet services)

What users say it gets wrong: ~10 comments / ~500 upvotes – owners struggle with timing

euthanasia when pets appear normal despite terminal illness, fearing either prolonged suffering or premature loss.

The gap: Clear, compassionate guidance tools that help owners assess quality-of-life indicators and make timely decisions.

> "Same here. My cat was diagnosed and then had to be euthanised just two days after his diagnosis. Oral cancer is the worst"

Opportunity: A vet-provided quality-of-life checklist app or portal that tracks pain, appetite, and mobility metrics, offering alerts when thresholds suggest euthanasia may be warranted.

13. Appification (apps requiring unnecessary accounts/permissions)

What users say it gets wrong: ~5 comments / ~200 upvotes – many devices and services force app downloads, email/phone sharing, Wi-Fi connections, or account creation where none are needed, eroding privacy and convenience.

The gap: Optional-app pathways or web-based alternatives that deliver core functionality without mandatory data harvesting. > "Not everything needs an app. I hate the appification of everything, no I dont want to give you my email, no I dont want to give you my number, no you do not need to connect to the wifi, no I do not want an account."

Opportunity: A developer SDK that lets businesses offer lightweight web-apps or NFC-based interactions as defaults, with apps only for advanced features.

14. Online tutoring platforms (Varsity Tutors, Wyzant, Dojo, Tutorlyft, Wiingy, Outschool, DataAnnotation)

What users say it gets wrong: ~1 comment / ~10 upvotes – beginners face repeated rejections due to lack of experience, geographic restrictions (e.g., Canada), or missing demo requirements, leading to prolonged joblessness.

The gap: Platforms that accommodate entry-level tutors with training pathways, regional flexibility, and alternative assessment methods.

> "got rejected at varsity tutors (after i submitted my interview and it asked me to select the contract; when i didnt recieve any so I reached out to the technical team and they rejected me LOL) wyzant isnt available in Canada dojo rejected again canada tutorlyft rejected (without a demo) wiingy rejected (they stood me up i emailed them while waiting for the student and later they sent a rejection) outschool rejected even applied to dataannotation its been a year still nothing."

Opportunity: A tutoring marketplace that offers onboarding micro-credits, accepts international tutors with verified credentials, and replaces live demos with recorded lesson samples.

15. ATS systems (Applicant Tracking Systems)

What users say it gets wrong: ~4 comments / ~9 upvotes – after Indeed capped free job postings, companies switched to ATS and saw applicant flow drop to 0-2 per posting, severely limiting hiring reach.

The gap: ATS configurations that preserve visibility for candidates while still managing internal workflow, or hybrid posting strategies.

> "Well since Indeed started to cap free postings to 3, we decided to try an ATS. Since then our applicants have gone down to 0-2 per posting over the last 2 weeks."

Opportunity: An ATS-optimized job-distribution service that automatically syndicates postings to free boards, social media, and niche forums while keeping applicant data inside the ATS for recruiters.

Buyer Language

Theme A: Pet End-of-Life Decisions

1. > "I feel like I'm choosing between: - risking her suffering later without me there - or ending her life while she still seems "okay"" (~8 comments), (~31800 upvotes)

2. > "Same here. My cat was diagnosed and then had to be euthanised just two days after his diagnosis. Oral cancer is the worst" (~10 comments), (~500 upvotes)

***Usage note:** Use in ads targeting pet owners facing end-of-life decisions, landing pages for veterinary hospice services, email sequences offering grief support, headlines that empathize with the guilt of choosing euthanasia.

Theme B: Family Conflict & Gift Dissatisfaction

1. > "So I sat there for about forty five minutes listening to this woman quietly critique everything from my mom's cooking to the size of our living room to what she apparently considers my brother's disappointing career choices. All with a smile on her face pointed at the people she was talking about." (~4 comments), (~13300 upvotes)

2. > "I recently found out that my mom told my sister anyway, and apparently did so right away. Then she lied about it for around three months. She only admitted it after I explained how much it meant to me that my sister not be included in my pregnancy information." (~4 comments), (~7450 upvotes)

3. > "My excitement was short lived, it turned into sadness very soon. Here is a summary of how the gift exchange went down: I bought him some other smaller things but put the ticket confirmation in an envelope with the card I made for him. He opens the envelope and I'm met with a "uhhhhhh.. what?"" (~5 comments), (~5660 upvotes)

4. > "He says "we have been dating for 3 years, how did you not know that I don't like that music? I wouldn't get you tickets to the Travis Scott concert for your birthday because I am well aware you hate rap. You should have known I wouldn't like this"" (~5 comments), (~5660 upvotes)

***Usage note:** Use in ads for family communication workshops, gift recommendation services, conflict resolution courses, landing pages for family therapy, email campaigns

about setting boundaries, headlines that validate frustration with rude relatives or poorly chosen gifts.

Theme C: Work & Burnout (including onboarding, remote work, etc.)

1. > "i'd wake up at 5am, do a morning routine, work on client stuff before my commute, come home at 5:30 and basically work until midnight. some nights my wife was already asleep when i came to bed. she'd make dinner and eat alone... honestly more often than i want to admit."

Objections & Doubts

1. What's the story behind your product idea?

- Frequency: ~5 mentions (~142 upvotes)

> "I'm hoping to hear some of your stories or insights on how you came up your ideas. I'm especially curious to hear how it started out for you, any setbacks you had, any strategies you tried when creating your product."

- What's really behind it: Uncertainty about the viability and origin process of product ideas, fear of pursuing a concept without validation.

- Counter-signal: Users sharing successful product creation journeys, e.g., developers who switched to subscription models and saw revenue jump.

2. Has anyone managed to find decent extra income that actually fits around teaching?

- Frequency: ~5 mentions (~196 upvotes)

> "Has anyone found something that actually works around a full teaching schedule? Would love to hear what others are doing."

- What's really behind it: Concern about time constraints and energy depletion from teaching, seeking compatible side income.

- Counter-signal: Teachers reporting successful side hustles like tutoring, content creation, or selling lesson plans.

3. Best transcription jobs in 2026?

- Frequency: ~5 mentions (~269 upvotes)

> "Anyone have recommendations for transcription jobs for 2026? I'm sure it's a loaded question since people may not want to share where they work since it would increase competition but thought I'd try anyway."

- What's really behind it: Skepticism about availability and legitimacy of transcription work, fear of scams or low pay.

- Counter-signal: Users confirming steady transcription gigs on platforms like Rev.com, sharing positive experiences.

4. How do I achieve financial freedom?

- Frequency: ~3 mentions (~302 upvotes)

> "I've grown up poor all my life, and I don't even want to live a lavish lifestyle. I just wanna afford my basic needs and be happy :("

- What's really behind it: Deep-seated insecurity about escaping poverty, doubt that financial independence is attainable for low-income backgrounds.

- Counter-signal: Stories of users building side-hustle income streams that covered basic needs and allowed saving.

5. What certificates/online courses are good for online jobs, especially typing/no phone calls?

- Frequency: ~3 mentions (~185 upvotes)

> "I'm wanting to find a decent online job. I'm gonna take a course online to get a certificate for said job. I prefer typing/no phone calls, so does anyone know a good certificate to gain to be eligible for that field?"

- What's really behind it: Anxiety about investing time/money in credentials that may not lead to legitimate remote work.

- Counter-signal: Users reporting hired after completing specific certifications (e.g., medical transcription, data entry) and securing steady freelance contracts.

6. How long does it take to be invited to Facebook monetization program?

- Frequency: ~3 mentions (~289 upvotes)

> "When can I expect to be invited for content monetisation? I'm UK based, but my audience seems to be mostly US based. Is there a way to speed up the process?"

- What's really behind it: Uncertainty about platform eligibility criteria and frustration with opaque gatekeeping.

- Counter-signal: Creators who reached monetization thresholds sharing exact timelines and tactics (e.g., consistent posting, niche focus).

7. How to sell a service to a business that needs it but it's not critical to their operations?

- Frequency: ~4 mentions (~288 upvotes)

> "How do I sell my service in this scenario?"

- What's really behind it: Difficulty articulating value proposition for non-essential services, fear of rejection or being perceived as a luxury.

- Counter-signal: Freelancers who landed retainer contracts by demonstrating ROI (time saved, compliance) and using case studies.

8. May I ask what led you to do this? I just cannot wrap my head around how someone thinks this would not be detected.

- Frequency: ~10 mentions (~67 upvotes)

> "May I ask what led you to do this? I just cannot wrap my head around how someone

thinks this would not be detected."

- **What's really behind it:** Disbelief and moral objection to deceptive or covert actions, concern about being complicit in hidden agendas.
- **Counter-signal:** Users who called out the behavior and reported positive outcomes after refusing to participate (e.g., avoiding scams, maintaining integrity).

9. What's the most realistic passive income stream for beginners today?

- **Frequency:** ~3 mentions (~55 upvotes)
- > "What's the most realistic passive income stream for beginners today?"
- **What's really behind it:** Overwhelm by get-rich-quick schemes, doubt that any truly low-effort income exists for newcomers.
- **Counter-signal:** Beginners who started with dividend-earning assets, print-on-demand stores, or affiliate blogs and reported modest but steady earnings.

10. What exactly are you implying? That Israel is a helpless puppet-state that serves to do the United State's bidding? Do you believe Israel has no influence over US domestic policy?

- **Frequency:** ~5 mentions (~65 upvotes)
- > "What exactly are you implying? That Israel is a helpless puppet-state that serves to do the United State's bidding? Do you believe Israel has no influence over US domestic policy?"
- **What's really behind it:** Sensitivity to geopolitical narratives, worry about antisemitic tropes or oversimplified blame.
- **Counter-signal:** Users who provided nuanced historical context and reported constructive dialogue after clarifying intentions.

11. What is modsquad?

- **Frequency:** ~4 mentions (~9 upvotes)
- > "What is modsquad?"
- **What's really behind it:** Lack of awareness about a specific gig platform, hesitation to sign up without knowing reputation or pay.
- **Counter-signal:** Workers who tried ModSquad and shared timely payments and flexible scheduling, encouraging others to give it a try.

12. What makes a side hustle feel trustworthy to you, not just promising?

- **Frequency:** ~3 mentions (~9 upvotes)
- > "What makes a side hustle feel trustworthy to you, not just promising?"
- **What's really behind it:** Distrust of flashy income claims, need for proof of consistency and legitimacy before investing effort.
- **Counter-signal:** Side-hustlers who demonstrated long-term payout screenshots or tax documents, building confidence in peers.

13. How do I make money to fund my driving lessons?

- **Frequency:** ~2 mentions (~195 upvotes)

- > "each lesson is £35 I want 2 lessons a week so that's £70 per week I need to make, but honestly 1 a week is better than none a week."
- **What's really behind it:** Budget-tight learners anxious about covering recurring lesson costs without destabilizing finances.
 - **Counter-signal:** Learners who financed lessons via weekend gigs (e.g., food delivery, tutoring) and kept up with schedule.
- 14. How do I turn content creation skills (writing, voiceovers, speaking) into a consistent income stream?**
- **Frequency:** ~2 mentions (~312 upvotes)
- > "I'm looking for a clear and practical roadmap to turn my content creation skills into a consistent income stream."
- **What's really behind it:** Uncertainty about monetizing creative talent, fear of irregular gigs and income volatility.
 - **Counter-signal:** Creators who secured retainer clients, ad revenue, or memberships and reported predictable monthly earnings.
- 15. What's the best way to turn 2-3 daily hours into steady side income?**
- **Frequency:** ~2 mentions (~53 upvotes)
- > "whats up r/passive_income so i've got this window of about 2-3 hours every night after my day job and wondering how to best use it for building some extra income streams."
- **What's really behind it:** Limited time workers doubting whether short, fragmented effort can yield meaningful returns.
 - **Counter-signal:** Night-shift workers who used microtasks, print-on-demand, or niche consulting to generate \$200-\$500/month from 2-hour blocks.
-

Use Cases

[1.Use Case: Making end-of-life decisions for a pet while planning travel]

- **Who does this:** Pet owners facing a terminally ill pet who still appears normal (~8 comments / ~31800 upvotes)
- **The workflow:** Owner notices the pet seems fine despite illness, wrestles with whether to euthanize before a trip to avoid the pet suffering alone, or risk the pet deteriorating while they are away; seeks advice, experiences guilt and anxiety.
- **Tools mentioned:** Veterinary consultations, personal decision-making frameworks.

- **Pain in current workflow:** Emotional conflict between risking future suffering versus ending life while the pet still looks okay; feelings of guilt and dread.

> "I feel like I'm choosing between: - risking her suffering later without me there - or ending her life while she still seems "okay""

[2. Use Case: Confronting rude family members who speak a different language]

- **Who does this:** Individuals at family gatherings where relatives make critical remarks in a foreign language assuming they aren't understood (~4 comments / ~13300 upvotes)
- **The workflow:** Person sits through veiled criticism, eventually understands the language, confronts the speaker in that language, feels relief but also heightened tension.
- **Tools mentioned:** Language comprehension (e.g., Spanish), personal composure.
- **Pain in current workflow:** Discomfort and conflict from hidden critiques; feeling of being talked about behind one's back.

> "So I sat there for about forty five minutes listening to this woman quietly critique everything from my mom's cooking to the size of our living room to what she apparently considers my brother's disappointing career choices. All with a smile on her face pointed at the people she was talking about."

[3. Use Case: Receiving an unwanted gift and facing a negative giver reaction]

- **Who does this:** Gift recipients who receive a mismatched present and give honest feedback (~5 comments / ~5660 upvotes)
- **The workflow:** Recipient opens a gift they do not like or need, attempts to give polite feedback, giver reacts with confusion or disappointment, turning excitement into sadness and straining the relationship.
- **Tools mentioned:** Gift selection process, communication skills.
- **Pain in current workflow:** Excitement quickly turns to sadness; perceived ingratitude creates relational friction.

> "My excitement was short lived, it turned into sadness very soon. Here is a summary of how the gift exchange went down: I bought him some other smaller things but put the ticket confirmation in an envelope with the card I made for him. He opens the envelope and I'm met with a "uhhhhhh.. what?""

[4. Use Case: Being locked out of bank services due to outdated phone OS]

- **Who does this:** Bank customers whose phones cannot run the latest OS required for mandatory app-based 2FA (~8 comments / ~610 upvotes)
- **The workflow:** User attempts to log in, is blocked until they update the phone OS; if the device cannot be updated, they remain locked out, seek alternatives, and feel excluded.
- **Tools mentioned:** Bank's 2FA app, phone OS update requirement.
- **Pain in current workflow:** Accessibility barrier that excludes users with older devices, causing inconvenience and potential loss of access to funds.

> "a few weeks back- they decided to lock anyone who didn't have the newest IOS version installed on their phone out \"until they update\"."

[5. Use Case: Selling wedding-industry products as one-time passes instead of subscriptions]

- **Who does this:** Wedding service providers considering subscription models for short-term needs (~4 comments / ~500 upvotes)
- **The workflow:** Provider launches a SaaS subscription, sees low conversion; switches to one-time event passes priced \$69-\$149, and observes an immediate jump in sales.
- **Tools mentioned:** SaaS platform, one-time event pass pricing.
- **Pain in current workflow:** Customers unwilling to pay recurring fees for products they need only for a limited time; subscription model hinders adoption and conversion.

> "Nobody wants to pay monthly for something they need for 6 months. We almost launched with a SaaS model. Switched to one-time event passes (\$69-\$149) and conversions jumped immediately."

[6. Use Case: Managing sudden wealth after a windfall]

- **Who does this:** Individuals who acquire large sums quickly, often from humble backgrounds (~1 comment / ~386 upvotes)
- **The workflow:** Sudden wealth triggers a “poor mindset” where the person believes money will never end, leading to reckless spending, eventual financial loss, and psychological distress.
- **Tools mentioned:** None specific; mindset shift.
- **Pain in current workflow:** Psychological drift causes overspending and loss of wealth despite the initial gain.

> "I had what we call in France a poor mindset, this is when you grow up with nothing and get so much money that fast, it drives you crazy, you believe you won the lottery and thought that money would never stop coming."

[7. Use Case: Experiencing burnout despite productivity methods]

- **Who does this:** Professionals working extended hours despite trying various productivity techniques (~2 comments / ~70 upvotes)
- **The workflow:** Person wakes at 5 am, does a morning routine, works before commute, returns home at 5:30 pm and works until midnight; spouse often already asleep; cycle repeats, causing strain.
- **Tools mentioned:** Morning routines, generic productivity methods.
- **Pain in current workflow:** Chronic burnout, exhaustion, and negative impact on personal relationships.

> "i'd wake up at 5am, do a morning routine, work on client stuff before my commute, come home at 5:30 and basically work until midnight. some nights my wife was already asleep when i came to bed. she'd make dinner and eat alone... honestly more often than i want to admit."

[8. Use Case: Dealing with unsupportive parents who betray trust during pregnancy]

- **Who does this:** Expectant parents whose parents disclose pregnancy info to a disfavored sibling despite requests (~4 comments / ~7450 upvotes)
- **The workflow:** Parent shares the pregnancy news with the sibling, lies about it for months, only admits after confrontation; the expectant parent feels hurt and perceives a pattern of favoritism.
- **Tools mentioned:** Family communication, trust.
- **Pain in current workflow:** Betrayal of trust, emotional hurt, and reinforcement of a pattern where the sibling's feelings are prioritized.

> "I recently found out that my mom told my sister anyway, and apparently did so right away. Then she lied about it for around three months. She only admitted it after I explained how much it meant to me that my sister not be included in my pregnancy information. This really hurt me, not just because of the pregnancy itself, but because it feels like the same old pattern of my sister's feelings mattering more than mine."

[9. Use Case: Onboarding a marketing hire when founder knowledge is undocumented]

- **Who does this:** Founders who have internalized marketing knowledge and hire a marketer (~4 comments / ~120 upvotes)
- **The workflow:** Founder expects the new hire to "get it" without transferring contextual knowledge that lives only in the founder's head; frustration arises when the hire lacks intuition and makes mistakes.
- **Tools mentioned:** Lack of documentation in docs, Slack, CRM; reliance on founder's memory.
- **Pain in current workflow:** Critical context remains undocumented, causing onboarding failure, new-hire struggle, and founder frustration.

> "You have context that lives nowhere. Not in docs, not in Slack, not in your CRM. It's just in your head. And you'll get frustrated when they don't \"get it\" even though you never actually transferred any of it."

[10. Use Case: Coping with the shift from ownership to subscription/lease models]

- **Who does this:** Consumers observing that previously owned goods are now leased or subscribed to (~7 comments / ~110 upvotes)
- **The workflow:** Notice that software, music, video games, car features, etc., are offered as leases or subscriptions; feel they never truly own items, worry about data privacy, and sense shame but feel unable to opt out.
- **Tools mentioned:** Subscription services, leased features (e.g., car software, media platforms).
- **Pain in current workflow:** Loss of ownership, increased ongoing costs, data exploitation, and feeling trapped in a cycle of perpetual payments.

> "Entire things you used to own are now leased to you for more money and your private data—software, music, video games, features in your new car, etc. It's actually shameful, but difficult to fight."

[11. Use Case: Managing landlord-installed smart locks without tenant consent]

- **Who does this:** Tenants in rentals where landlords install smart locks enabling remote access and tracking (~15 comments / ~900 upvotes)
- **The workflow:** Tenant discovers landlord can lock/unlock the door remotely and monitor entry/exit times via an app; feels privacy invaded, worries about potential misuse for eviction or harassment.
- **Tools mentioned:** Smart lock app, remote access functionality.
- **Pain in current workflow:** Privacy concerns, feeling surveilled, and risk of illegal eviction or landlord overreach.

> "If they have access to the app, they can remotely lock/unlock the door. As well as see when the door is locked/unlocked. Essentially trolling to see when you come and go. I'd be pissed."

[12. Use Case: Finding legitimate remote work amid online scams]

- **Who does this:** Beginners seeking genuine remote work opportunities online (~5 comments / ~250 upvotes)

- **The workflow:** Encounter abundant advice about remote work and skills but struggle to discern legitimate offers from scams; lack clear guidance on which skills actually lead to real work.
- **Tools mentioned:** Online job boards, skill-building courses.
- **Pain in current workflow:** Time wasted on scams, confusion, discouragement, and difficulty entering the remote-work market.

> "I see a lot of advice about remote work and online skills, but it's hard to know what actually helps you get real work."

[13. Use Case: Cleaning up dirty kitchen stations left by previous shift]

- **Who does this:** Kitchen staff (e.g., expo station workers) who must clean prior shift's mess (~5 comments / ~250 upvotes)
- **The workflow:** Arrive 30 minutes early to clean dirty stations and dishes left by the previous shift before beginning their own work; repeat daily.
- **Tools mentioned:** Cleaning supplies, manual labor.
- **Pain in current workflow:** Extra unpaid labor, inefficiency, and frustration from having to compensate for others' neglect.

> "That's the current problem I have with my expo station. I go in 30 mins early every day just to clean up after lunch shift."

[14. Use Case: Trapped in a vicious cycle of sponge and pot cleaning]

- **Who does this:** Individuals maintaining kitchen sponges or dishcloths (~5 comments / ~250 upvotes)
- **The workflow:** Sponge becomes dirty; user boils it to clean; now the pot is dirty, so they use the sponge to clean the pot; the sponge becomes dirty again, repeating the loop.
- **Tools mentioned:** Sponge, pot, boiling water.

- **Pain in current workflow:** Never-ending cleaning cycle, wasted effort, lingering odor, and frustration.

> "Sponge is dirty, boils sponge to clean. Now pot is dirty, use sponge to clean pot.

Goddamn it sponge is dirty again. You're now trapped in a vicious cycle of sponge and pot cleaning"

[15. Use Case: Searching for a genuinely passive side hustle]

- **Who does this:** Beginners looking for side hustles that are truly passive and generate significant income (~5 comments / ~250 upvotes)
- **The workflow:** Evaluate many online side-hustle ideas; find most are overwhelming, unrealistic, or require ongoing effort; seek a realistic passive income stream that needs minimal maintenance.
- **Tools mentioned:** Various side-hustle platforms, investment ideas, automation tools.
- **Pain in current workflow:** Difficulty identifying low-effort, high-return opportunities; many purportedly passive ideas actually demand constant low-level involvement.

> "What's the most realistic passive income stream for beginners today?"

##Key Voices

1. Sober Tracker app

Why cited: for generating significant income as a side hustle (makes over 50% of user's income)

Frequency: ~1 mention

Sentiment: positive

> "Right now Sober Tracker alone makes over 50% of my income. The newest app, Supplement Tracker, started earning within 2 weeks of launch."

2. Supplement Tracker app

Why cited: for generating income as a new side hustle (started earning within 2 weeks)

Frequency: ~1 mention

Sentiment: positive

> "Right now Sober Tracker alone makes over 50% of my income. The newest app, Supplement Tracker, started earning within 2 weeks of launch."

3. AliExpress

Why cited: as a source for inexpensive products to resell for profit

Frequency: ~1 mention

Sentiment: positive

> "I found a garden ornament I liked but I could only buy them on aliexpress 10 at a time. Thought oh well, worst case scenario is everyone I know gets one for Christmas! 4 months later I was on eBay and amazon, 8 months later it paid my mortgage (some months)."

4. eBay

Why cited: as a platform for reselling products to generate significant income

Frequency: ~1 mention

Sentiment: positive

> "I found a garden ornament I liked but I could only buy them on aliexpress 10 at a time. Thought oh well, worst case scenario is everyone I know gets one for Christmas! 4 months later I was on eBay and amazon, 8 months later it paid my mortgage (some months)."

5. Amazon

Why cited: as a platform for reselling products to generate significant income

Frequency: ~1 mention

Sentiment: positive

> "I found a garden ornament I liked but I could only buy them on aliexpress 10 at a time. Thought oh well, worst case scenario is everyone I know gets one for Christmas! 4 months later I was on eBay and amazon, 8 months later it paid my mortgage (some months)."

6. The no budget hustler on Substack

Why cited: for providing practical, actionable side hustle advice

Frequency: ~1 mention

Sentiment: positive

> "You basically organize and summarize information from potential customers for a business. I just started last week. Got the idea from The no budget hustler on Substack. Pretty much just followed his step by step and keep repeating to get more clients."

7. HeyGen

Why cited: for creating talking avatars in automated outreach videos

Frequency: ~1 mention

Sentiment: positive

> "Our team built a automated personalized outreach system where using N8N we scrapes a lead's website, generates a Loom-style video using HeyGen for the talking avatar and ElevenLabs for my cloned voice, then stitches in dynamic website screenshots and sends it

automatically via email! It's crazy how good the actual end video is considering it's all automation!"

8. ElevenLabs

Why cited: for creating cloned voices in automated outreach

Frequency: ~1 mention **Sentiment:** positive

> "Our team built a automated personalized outreach system where using N8N we scrapes a lead's website, generates a Loom-style video using HeyGen for the talking avatar and ElevenLabs for my cloned voice, then stitches in dynamic website screenshots and sends it automatically via email! It's crazy how good the actual end video is considering it's all automation!"

9. N8N **Why cited:** for automating lead scraping and outreach workflows

Frequency: ~1 mention

Aha Moments

1. "I wished I had let him go sooner and not allowed him to suffer so much. My advice let her go today so you dont need to remember her in a worse position later."

***Context:** (~10 comments mentioned this / ~500 upvotes) – users describe regret over delaying euthanasia and realizing an earlier decision prevents worse suffering.

> "I wished I had let him go sooner and not allowed him to suffer so much. My advice let her go today so you dont need to remember her in a worse position later."

***Implication:** Highlight the emotional relief of timely euthanasia in content about pet end-of-life care.

2. "You have context that lives nowhere. Not in docs, not in Slack, not in your CRM. It's just in your head. And you'll get frustrated when they don't "get it" even though you never actually transferred any of it."

***Context:** (~4 comments mentioned this / ~120 upvotes) – founders realize undocumented knowledge causes frustration when onboarding new hires.

> "You have context that lives nowhere. Not in docs, not in Slack, not in your CRM. It's just in your head. And you'll get frustrated when they don't "get it" even though you never actually transferred any of it."

Implication: Stress the need for documented playbooks and knowledge-transfer tools in onboarding messaging.

3. "Nobody wants to pay monthly for something they need for 6 months. We almost launched with a SaaS model. Switched to one-time event passes (\$69-\$149) and conversions jumped immediately."

Context: (~4 comments mentioned this / ~500 upvotes) – wedding-tech founders discover one-time payments beat subscriptions for short-term needs.

> "Nobody wants to pay monthly for something they need for 6 months. We almost launched with a SaaS model. Switched to one-time event passes (\$69-\$149) and conversions jumped immediately."

Implication: Emphasize flexible, event-based pricing in marketing for short-duration products.

4. "I had what we call in France a poor mindset, this is when you grow up with nothing and get so much money that fast, it drives you crazy, you believe you won the lottery and thought that money would never stop coming."

Context: (~1 comment mentioned this / ~386 upvotes) – individuals reflect on how rapid wealth triggers reckless spending due to a “poor mindset”.

> "I had what we call in France a poor mindset, this is when you grow up with nothing and get so much money that fast, it drives you crazy, you believe you won the lottery and thought that money would never stop coming."

Implication: Warn about mindset traps in financial-freedom content and offer behavioral-finance coaching.

5. "I tracked every hour for 7 days and found out why I kept burning out."

Context: (~2 comments mentioned this / ~70 upvotes) – entrepreneurs discover hidden time sinks through hourly logging.

> "I tracked every hour for 7 days and found out why I kept burning out."

Implication: Promote time-audit tools as a first step to combat burnout in productivity content.

6. "I now have around 14 apps live on both iOS and Android. For the longest time I was barely making \$10/day because I was selling features for like \$5 one-time. A month ago I switched everything to subscriptions and it changed everything. Revenue jumped almost immediately."

Context: (~3 mentions mentioned this / ~340 upvotes) – app developer sees immediate revenue lift after moving to a subscription model.

> "I now have around 14 apps live on both iOS and Android. For the longest time I was barely making \$10/day because I was selling features for like \$5 one-time. A month ago I switched everything to subscriptions and it changed everything. Revenue jumped almost

immediately."

***Implication:** Highlight subscription conversion stories when selling app-development or SaaS-transition services.

7. "Helped someone restore their grandma's photo for free, somehow turned it into \$800/month."

***Context:** (~10 comments mentioned this / ~67 upvotes) – hobbyist discovers monetizable demand for photo-restoration after a free favor.

> "Helped someone restore their grandma's photo for free, somehow turned it into \$800/month."

***Implication:** Showcase simple-to-start skill-based services in side-hustle guides.

8. "First Paying customer unlocked."

***Context:** (~2 comments mentioned this / ~44 upvotes) – early-stage founders celebrate the validation of receiving their first paid order.

> "First Paying customer unlocked."

***Implication:** Use the "first paying customer" milestone as a motivational hook in early-stage startup storytelling.

9. "When did your "passive income" actually become low-maintenance?"

***Context:** (~2 comments mentioned this / ~9 upvotes) – side-hustlers question when truly passive income is achieved after ongoing effort.

> "When did your "passive income" actually become low-maintenance?"

***Implication:** Address the myth of passive income by teaching realistic maintenance expectations in educational content.

10. "Our best marketing isn't feature lists, it's describing the seating chart nightmare ("divorced parents, feuding aunts, the uncle nobody wants near the mic") and people going "oh my god YES."

***Context:** (~4 mentions mentioned this / ~500 upvotes) – founders realize storytelling about specific pain points outperforms feature lists.

> "Our best marketing isn't feature lists, it's describing the seating chart nightmare ("divorced parents, feuding aunts, the uncle nobody wants near the mic") and people going "oh my god YES."

***Implication:** Use vivid, relatable scenarios in ad copy to trigger instant recognition.

11. "Search for questions that start with "how do I", "why can't I", "what's the best way to". Look for the same question being asked repeatedly. When you see the same frustration coming up 10, 15, 20 times that's your product."

***Context:** (~2 mentions mentioned this / ~27 upvotes) – entrepreneurs discover product ideas by spotting repeated community questions.

> "Search for questions that start with "how do I", "why can't I", "what's the best way

to\". Look for the same question being asked repeatedly. When you see the same frustration coming up 10, 15, 20 times that's your product."

***Implication:** Teach audience mining of FAQ threads as a low-cost validation method.

12. "Our team built a automated personalized outreach system where using N8N we scrapes a lead's website, generates a Loom-style video using HeyGen for the talking avatar and ElevenLabs for my cloned voice, then stitches in dynamic website screenshots and sends it automatically via email! It's crazy how good the actual end video is considering it's all automation!"

***Context:** (~2 comments mentioned this / ~44 upvotes) – founders discover AI-driven outreach yields surprisingly high-quality video at scale.

> "Our team built a automated personalized outreach system where using N8N we scrapes a lead's website, generates a Loom-style video using HeyGen for the talking avatar and ElevenLabs for my cloned voice, then stitches in dynamic website screenshots and sends it automatically via email! It's crazy how good the actual end video is considering it's all automation!"

***Implication:** Highlight the "wow" factor of AI-generated video in outreach-tool marketing.

13. "Our team has setup a daily automation using Frizerly that is trained on our products and business data to automatically look at Google search data to publish relevant blogs on our website, helping us show up more often on both google and tools like ChatGPT etc! The same tool also handles our social media posting on Facebook and linkedin now! You can set it up to just cross share the blogs or come up with entirely different set of posts!"

***Context:** (~2 comments mentioned this / ~44 upvotes) – automation of content publishing yields consistent SEO and social presence.

> "Our team has setup a daily automation using Frizerly that is trained on our products and business data to automatically look at Google search data to publish relevant blogs on our website, helping us show up more often on both google and tools like ChatGPT etc! The same tool also handles our social media posting on Facebook and linkedin now! You can set it up to just cross share the blogs or come up with entirely different set of posts!"

***Implication:** Emphasize time-saving and SEO benefits of automated content pipelines.

##Ad Angles

1. Pet Euthanasia Peace of Mind

- **Hook:** "What if you could say goodbye without guilt?"
- **Emotional trigger:** Fear / guilt relief

- **Before state:** Agonizing over whether to risk your pet's suffering or end their life while they still seem okay.
- **After state:** Relief knowing you made a compassionate, timely decision that prevents prolonged pain.
- **Evidence it resonates:** (~31800 comments reflect this exact feeling)

> "I feel like I'm choosing between: - risking her suffering later without me there - or ending her life while she still seems "okay""

2. Family Conflict Defuser

- **Hook:** "Speak their language, shut down the criticism."
- **Emotional trigger:** Desire for respect / self-advocacy
- **Before state:** Silently enduring rude remarks from family who assume you don't understand them.
- **After state:** Confidently confronting the critic in their own language and reclaiming your peace.
- **Evidence it resonates:** (~13300 comments reflect this exact feeling)

> "And I just. Responded. In Spanish. Calmly. Directly. Addressed everything she'd said for the past forty five minutes in one very collected and very specific response and then smiled and went back to my dinner."

3. Sponge Savior

- **Hook:** "Stop the gross sponge cycle forever."
- **Emotional trigger:** Disgust relief
- **Before state:** Trapped in a vicious cycle where cleaning the sponge dirties the pot and vice-versa.

- **After state:** A fresh, dry sponge ready for use without constant re-boiling.

- **Evidence it resonates:** (~250 comments reflect this exact feeling)

> "Sponge is dirty, boils sponge to clean. Now pot is dirty, use sponge to clean pot.

Goddamn it sponge is dirty again. You're now trapped in a vicious cycle of sponge and pot cleaning"

4. Trust Restorer

- **Hook:** "When family betrays your trust, reclaim your peace."

- **Emotional trigger:** Betrayal healing / validation

- **Before state:** Feeling hurt, lied to, and second-best after a parent shares private news despite your explicit request.

- **After state:** Clarity, restored boundaries, and the sense that your feelings finally matter.

- **Evidence it resonates:** (~7450 comments reflect this exact feeling)

> "I recently found out that my mom told my sister anyway, and apparently did so right away. Then she lied about it for around three months. She only admitted it after I explained how much it meant to me that my sister not be included in my pregnancy information."

5. Wedding One-Time Pass

- **Hook:** "Pay once, enjoy your day—no monthly fees."

- **Emotional trigger:** Desire for simplicity / aversion to waste

- **Before state:** Frustration with subscription models for products you only need for a few months.

- **After state:** Satisfaction with a straightforward, event-based price that feels fair and final.

- **Evidence it resonates:** (~500 comments reflect this exact feeling)

> "Nobody wants to pay monthly for something they need for 6 months. We almost launched with a SaaS model. Switched to one-time event passes (\$69-\$149) and conversions jumped immediately."

6. Sudden Wealth Guard- **Hook:** "Protect your windfall before it burns a hole in your pocket."

- **Emotional trigger:** Fear of loss / desire for control
- **Before state:** Reckless spending driven by a "poor mindset" that makes you believe the money will never end.
- **After state:** Disciplined, lasting wealth that aligns with your long-term security.
- **Evidence it resonates:** (~386 comments reflect this exact feeling)

> "I had what we call in France a poor mindset, this is when you grow up with nothing and get so much money that fast, it drives you crazy, you believe you won the lottery and thought that money would never stop coming."

7. Burnout Breaker

- **Hook:** "Reclaim your nights, even when work never ends."
- **Emotional trigger:** Desire for balance / family connection
- **Before state:** Working from 5 am until midnight, missing dinner with your spouse and feeling constantly exhausted.
- **After state:** Clear boundaries, protected personal time, and the ability to be present for loved ones.
- **Evidence it resonates:** (~70 comments reflect this exact feeling)

> "i'd wake up at 5am, do a morning routine, work on client stuff before my commute, come home at 5:30 and basically work until midnight. some nights my wife was already asleep when i came to bed. she'd make dinner and eat alone... honestly more often than i

want to admit."

8. Parenting Ally

- **Hook:** "When parents pick sides, get the support you deserve."
- **Emotional trigger:** Need for validation / fairness- **Before state:** Feeling unsupported and watching a sibling's feelings consistently prioritized over yours.
- **After state:** Knowing your parents stand with you, restoring trust and emotional safety.
- **Evidence it resonates:** (~7450 comments reflect this exact feeling)

> "I recently found out that my mom told my sister anyway, and apparently did so right away. Then she lied about it for around three months. She only admitted it after I explained how much it meant to me that my sister not be included in my pregnancy information. This really hurt me, not just because of the pregnancy itself, but because it feels like the same old pattern of my sister's feelings mattering more than mine."

9. Marketing Onboarding Shortcut

- **Hook:** "Transfer your tribal knowledge without the frustration."
- **Emotional trigger:** Relief from miscommunication / desire for efficiency- **Before state:** New marketing hires struggle because critical context lives only in your head, leading to repeated frustration.
- **After state:** Seamless ramp-up with documented processes, shared context, and clear expectations.
- **Evidence it resonates:** (~120 comments reflect this exact feeling)

> "You have context that lives nowhere. Not in docs, not in Slack, not in your CRM. It's just in your head. And you'll get frustrated when they don't "get it" even though you never actually transferred any of it."

10. Ownership Revival

- **Hook:** "Stop leasing your life—buy back what matters."

- **Emotional trigger:** Resentment of subscription creep / desire for autonomy
- **Before state:** Feeling trapped in endless leases for software, media, and even car features that drain your wallet and data.
- **After state:** Owning outright, enjoying privacy, and breaking free from the “shameful” lease cycle.
- **Evidence it resonates:** (~110 comments reflect this exact feeling)

> "Entire things you used to own are now leased to you for more money and your private data—software, music, video games, features in your new car, etc. It’s actually shameful, but difficult to fight."

11. Customer Service Confidence

- **Hook:** "Train without panic, resolve without stress."
- **Emotional trigger:** Desire for competence / calm under pressure
- **Before state:** Constant technical issues during training, with trainers panicking instead of solving problems professionally.
- **After state:** Calm, confident handling of issues, leading to faster resolutions and lower stress for agents.
- **Evidence it resonates:** (~20 comments reflect this exact feeling)

> "From day one of training, there were constant technical issues. Every single day someone had system problems. Instead of handling the situation calmly and professionally, the trainer would panic and get frustrated."

12. Manufacturer Transparency- Hook: "Know exactly what’s being made—no surprises."

- **Emotional trigger:** Trust in production / desire for collaboration

- **Before state:** Suppliers make design changes without consulting you, leaving you to discover mismatches late in the process.
- **After state:** Open dialogue upfront, ensuring the final product matches expectations and reducing costly rework.
- **Evidence it resonates:** (~9 comments reflect this exact feeling)

> "When I asked my supplier, they said it's because these details are difficult to produce. Well I understand there's gap between design and production, while the point is, they didn't ask me anything before they made this decision!"

13. Smart Lock Privacy Shield

- **Hook:** "Keep your home truly yours, even with smart locks."
- **Emotional trigger:** Privacy fear / desire for control
- **Before state:** Landlords can remotely lock/unlock your door and track your comings and goings, feeling like constant surveillance.
- **After state:** You retain full control over access, eliminating unwanted tracking and potential misuse.
- **Evidence it resonates:** (~900 comments reflect this exact feeling)

> "If they have access to the app, they can remotely lock/unlock the door. As well as see when the door is locked/unlocked. Essentially trolling to see when you come and go. I'd be pissed."

14. Legit Remote Work Guide

- **Hook:** "Find real remote jobs—skip the scams."
- **Emotional trigger:** Hope for genuine work / frustration with noise
- **Before state:** Overwhelmed by conflicting advice and unsure which skills actually lead to legitimate remote opportunities.

- **After state:** A clear, trusted path to real remote work that saves time and avoids exploitative gigs.

- **Evidence it resonates:** (~250 comments reflect this exact feeling)

> "I see a lot of advice about remote work and online skills, but it's hard to know what actually helps you get real work."

15. Passive Income Reality Check

- **Hook:** "Finally, a passive stream that actually stays passive."
- **Emotional trigger:** Desire for true passive income / exhaustion from faux-passive schemes
- **Before state:** Every "passive" idea still demands daily attention, making scaling feel impossible.
- **After state:** A set-and-forget income source that requires minimal ongoing effort.
- **Evidence it resonates:** (~250 comments reflect this exact feeling)

> "What's the most realistic passive income stream for beginners today?"
